Documento: 3603 ES E PE 03-

Data
November 15th 2023

Technician
Ing. Roberto Cereda

Signature

1. GENERALITY

The document **3603 ES E PE 03-** is an integral part of the project description with the following address. This project was prepared by L22, a part of Lombardini S.p.A. located at Via Lombardini 22, Milan.

This volume, along with the remaining volumes of the Technical Report, drawings, and documents produced by the Client related to the general supply conditions, must be countersigned for acceptance on every page and returned to the Client. Examining all the documents is, therefore, a fundamental condition for the quotation and execution of the systems. Everything contained within is also fundamental for the correct interpretation of the instructions and provisions found in the other project documents. If there are any doubts about the correct application of their content, you should inform the designer so that they can provide the necessary clarifications in a timely manner.

The designer cannot be held responsible for any consequences resulting from the failure to comply with the above.

2. CLARIFICATIONS:

The descriptions provided here indicate the minimum functional performance requirements. The Contracting Company must carefully examine all the data and provisions contained in this document, as they will be fully and unconditionally responsible, by contractual agreement, for the correct functioning of the system, ensuring compliance with the specified conditions and operational requirements.
Regarding topics not covered or specific details not mentioned, it is required that the materials used and the execution of the work comply with European standards of equivalent value and have standardized dimensions according to the current Uni and DIN tables.
Further clauses regarding the relationship between the Client and the Contracting Company will be defined in the Contract of Award, to which this document and its attachments are an integral part.
Materials for which samples have been requested cannot be installed until they are accepted by the Site Management. The Contracting Company should not install materials rejected by the Site Management and should remove them from the construction site. The products to be installed should be those indicated in the project or, in the absence of a specific indication, those listed in the brand list.
The minimum warranty period is **24 (twenty-four)** months from the start of operation, as established by the Italian Codice Civile, Art. 1667. During this period, all defective parts must be replaced free of charge and in the shortest possible time.
The prices include and compensate for all expenses for labour, necessary supplies, their processing and use, allowances for access, deposits, site occupation, temporary and different occupations, provisional means of labor, and any other conditions specified in the safety plan attached to the documentation, with no exceptions, as well as charges, transportation, unloading, and everything else necessary to ensure that the work is completed to the highest standards and in full efficiency. The prices also include compensation for all the expenses that the contractor will incur for this purpose, even if not explicitly specified or referred to in the various articles of the list, except for what is explicitly excluded and, in any case, the scaffolding for external works outside of buildings.

If the project documentation contains conflicting data or information, the more costly and safety-beneficial ones shall be considered. The type of contract is defined in the contract drafted by the Client. The Contract will be awarded to a General Contractor, who will be responsible for the complete implementation of the work, of which the project in question is one of the constituent parts.
All works related to the contract will be carried out by the contractor in accordance with the provisions and conditions specified in the project drawings. It is essential to note that these provisions are not exhaustive, as the contractor expressly commits to executing the work in perfect accordance with the state of the art, in compliance with current legal regulations, to deliver a fully operational system at the offered price. In any case, it is the responsibility and obligation of the installer to deal with any issues arising from the application of clearly incorrect indications, such as those due to printing errors or the omission of essential safety measures if such errors/omissions are detectable based on the technical knowledge that the installer, by law, must possess, ensuring the conformity of the systems with the state of the art.
All works must be coordinated with the execution of other tasks, and the construction schedule must be submitted to the Site Management. During the course of the work, in accordance with the site and Client's needs, temporary works may be required to maintain the operation of existing systems or to enable the temporary operation of systems covered by this contract. The Contractor will be responsible for the operation of functional areas that must be kept operational during the work.
No changes in the execution of the planned works can be made by the installation company without prior approval and written authorization from the Client and the Site Manager.
If personnel engage in actions deemed serious by the Site Manager, they are granted the authority to immediately expel them without the Contractor being entitled to seek an extension or damages.

The Contractor, upon signing the contract, indemnifies the Client from any possible recourse action by subcontractors in the event of a dispute between the Contractor and the subcontractor.

The following points are the responsibility of the Contractor:

- Costs related to procedures for the application and compliance with regulations;
- certificates, etc., regarding the installation;
- Costs related to commissioning, fine-tuning, and testing of the system;
- Training of the Client's personnel;
- Inspection costs;
- Warranty costs;
- Costs related to documentation, as-built drawings, manuals, operating instructions;
- certifications according to current regulations;
- Documentation as required by D.M. 37/08. Attached to the compliance declaration, forms for submitting the declaration to ISPESL and ASL/ARPA must be prepared, in accordance with DPR 462/01;

- Costs related to on-site safety;
- Costs for coordination with other Contractors directed by the Client;
- Costs for site cleaning;
- Disposal of waste materials in authorized landfills;
- Costs for the custody and protection of materials installed and stored;
- Site organization;
- Costs for connections and temporary systems;
- Costs for personnel hygiene;

Nr. 14 025031c	Cavo flessibile conforme CEI 20-13, isolato con gomma etilenpropilenica ad alto modulo con guaina in mescola termoplastica, tensione nominale 0,6/1 kV, a bassissima emissione di fumi, gas tossici e nocivi conforme CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011 - Prodotti da Costruzione CPR e alla CEI UNEL 35324, classe Cca-s1b,d1,a1: pentapolare FG16OM16 - 0,6/1 kV: sezione 4 mmq *Flexible cable according to CEI 20-13, insulated with high modulus ethylene propylene rubber with thermoplastic compound sheath, nominal voltage 0.6/1 kV, with very low emission of fumes, toxic and harmful gases compliant with CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011 - Construction Products CPR and CEI UNEL 35324, class Cca-s1b,d1,a1: pentapolar FG16OM16 - 0,6/1 kV: section 4 mmq* **euro**	m	
Nr. 15 025031e	Cavo flessibile conforme CEI 20-13, isolato con gomma etilenpropilenica ad alto modulo con guaina in mescola termoplastica, tensione nominale 0,6/1 kV, a bassissima emissione di fumi, gas tossici e nocivi conforme CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011 - Prodotti da Costruzione CPR e alla CEI UNEL 35324, classe Cca-s1b,d1,a1: pentapolare FG16OM16 - 0,6/1 kV: sezione 10 mmq *Flexible cable according to CEI 20-13, insulated with high modulus ethylene propylene rubber with thermoplastic compound sheath, nominal voltage 0.6/1 kV, with very low emission of fumes, toxic and harmful gases compliant with CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011 - Construction Products CPR and CEI UNEL 35324, class Cca-s1b,d1,a1: pentapolar FG16OM16 - 0,6/1 kV: section 10 mmq* **euro**	m	
Nr. 16 025031f	Cavo flessibile conforme CEI 20-13, isolato con gomma etilenpropilenica ad alto modulo con guaina in mescola termoplastica, tensione nominale 0,6/1 kV, a bassissima emissione di fumi, gas tossici e nocivi conforme CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011 - Prodotti da Costruzione CPR e alla CEI UNEL 35324, classe Cca-s1b,d1,a1: pentapolare FG16OM16 - 0,6/1 kV: sezione 16 mmq *Flexible cable according to CEI 20-13, insulated with high modulus ethylene propylene rubber with thermoplastic compound sheath, nominal voltage 0.6/1 kV, with very low emission of fumes, toxic and harmful gases compliant with CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011 - Construction Products CPR and CEI UNEL 35324, class Cca-s1b,d1,a1: pentapolar FG16OM16 - 0,6/1 kV: section 16 mmq* **euro**	m	
Nr. 17 025031g	Cavo flessibile conforme CEI 20-13, isolato con gomma etilenpropilenica ad alto modulo con guaina in mescola termoplastica, tensione nominale 0,6/1 kV, a bassissima emissione di fumi, gas tossici e nocivi conforme CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011 - Prodotti da Costruzione CPR e alla CEI UNEL 35324, classe Cca-s1b,d1,a1: pentapolare FG16OM16 - 0,6/1 kV: sezione 25 mmq *Flexible cable according to CEI 20-13, insulated with high modulus ethylene propylene rubber with thermoplastic compound sheath, nominal voltage 0.6/1 kV, with very low emission of fumes, toxic and harmful gases compliant with CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011 - Construction Products CPR and CEI UNEL 35324, class Cca-s1b,d1,a1: pentapolar FG16OM16 - 0,6/1 kV: section 25 mmq* **euro**	m	
Nr. 18 025036b	Cavo flessibile, isolato con gomma etilenpropilenica ad alto modulo con guaina in mescola termoplastica, tensione nominale 0,6/1 kV, a bassissima emissione di fumi, gas tossici e nocivi conforme CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europea Regolamento UE 305/2011- Prodotti da Costruzione CPR e alla CEI UNEL 35324, classe B2ca-s1a,d1,a1: tripolare FG18OM16-0,6/1 kV: sezione 2,5 mmq *Flexible cable, insulated with high modulus ethylene propylene rubber with thermoplastic compound sheath, nominal voltage 0.6/1 kV, with very low emission of fumes, toxic and harmful gases according to CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of the European Regulation EU Regulation 305/2011- Construction Products CPR and CEI UNEL 35324, class B2ca-s1a,d1,a1: tripolar FG18OM16-0,6/1 kV: section 2,5 mmq* **euro**	m	
Nr. 19 025039h	Cavo flessibile, isolato con mescola elastomerica reticolata G18 con guaina speciale termoplastica, barriera ignifuga nastro mica/vetro, tensione nominale 0,6/1 kV, a bassissima emissione di fumi e gas tossici CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011- Prodotti da Costruzione CPR (classe B2ca-s1a, d1, a1) e alle norme CEI UNEL 35016, classe B2ca-s1a,d1,a1: unipolare FTG18M16: sezione 35 mmq *Flexible cable, insulated with cross-linked elastomeric compound G18 with special thermoplastic sheath, flame retardant barrier mica/glass tape, nominal voltage 0.6/1 kV, with very low emission of fumes and toxic gases CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011- CPR Construction Products (class B2ca-s1a, d1, a1) and CEI UNEL 35016, class B2ca-s1a,d1,a1: unipolar FTG18M16: section 35 mmq* **euro**	cad	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 20 025039i	Cavo flessibile, isolato con mescola elastomerica reticolata G18 con guaina speciale termoplastica, barriera ignifuga nastro mica/vetro, tensione nominale 0,6/1 kV, a bassissima emissione di fumi e gas tossici CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011- Prodotti da Costruzione CPR (classe B2ca-s1a, d1, a1) e alle norme CEI UNEL 35016, classe B2ca-s1a,d1,a1: unipolare FTG18M16: sezione 50 mmq *Flexible cable, insulated with cross-linked elastomeric compound G18 with special thermoplastic sheath, flame retardant barrier mica/glass tape, nominal voltage 0.6/1 kV, with very low emission of fumes and toxic gases CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011- CPR Construction Products (class B2ca-s1a, d1, a1) and CEI UNEL 35016, class B2ca-s1a,d1,a1: unipolar FTG18M16: section 50 mmq* **euro**	cad	
Nr. 21 025039j	Cavo flessibile, isolato con mescola elastomerica reticolata G18 con guaina speciale termoplastica, barriera ignifuga nastro mica/vetro, tensione nominale 0,6/1 kV, a bassissima emissione di fumi e gas tossici CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011- Prodotti da Costruzione CPR (classe B2ca-s1a, d1, a1) e alle norme CEI UNEL 35016, classe B2ca-s1a,d1,a1: unipolare FTG18M16: sezione 70 mmq *Flexible cable, insulated with cross-linked elastomeric compound G18 with special thermoplastic sheath, flame retardant barrier mica/glass tape, nominal voltage 0.6/1 kV, with very low emission of fumes and toxic gases CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011- CPR Construction Products (class B2ca-s1a, d1, a1) and CEI UNEL 35016, class B2ca-s1a,d1,a1: unipolar FTG18M16: section 70 mmq* **euro**	cad	
Nr. 22 025039k	Cavo flessibile, isolato con mescola elastomerica reticolata G18 con guaina speciale termoplastica, barriera ignifuga nastro mica/vetro, tensione nominale 0,6/1 kV, a bassissima emissione di fumi e gas tossici CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011- Prodotti da Costruzione CPR (classe B2ca-s1a, d1, a1) e alle norme CEI UNEL 35016, classe B2ca-s1a,d1,a1: unipolare FTG18M16: sezione 95 mmq *Flexible cable, insulated with cross-linked elastomeric compound G18 with special thermoplastic sheath, flame retardant barrier mica/glass tape, nominal voltage 0.6/1 kV, with very low emission of fumes and toxic gases CEI 20-38, non-propagating fire and flame compliant with EN 60332-1-2, EN 50399 and the requirements of European Regulation EU Regulation 305/2011- CPR Construction Products (class B2ca-s1a, d1, a1) and CEI UNEL 35016, class B2ca-s1a,d1,a1: unipolar FTG18M16: section 95mmq* **euro**	cad	
Nr. 23 025041c	Cavo flessibile, isolato con mescola elastomerica reticolata G18 con guaina speciale termoplastica, barriera ignifuga nastro mica/vetro, tensione nominale 0,6/1 kV, a bassissima emissione di fumi e gas tossici CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011- Prodotti da Costruzione CPR (classe B2ca-s1a, d1, a1) e alle norme CEI UNEL 35016, classe B2ca-s1a,d1,a1: tripolare FTG18OM16: sezione 4 mmq *Flexible cable, insulated with G18 cross-linked elastomeric compound with special thermoplastic sheathing, fire retardant barrier mica/glass tape, rated voltage 0.6/1 kV, very low smoke and toxic gas emission CEI 20-38, fire- and flame-retardant in accordance with EN 60332-1-2, EN 50399 and the requirements of Europe Regulation EU 305/2011- Construction Products CPR (class B2ca-s1a, d1, a1) and CEI UNEL 35016 standards, class B2ca-s1a,d1,a1: 3-pole FTG18OM16: 4 sq. mm section* **euro**	m	
Nr. 24 025043c	Cavo flessibile, isolato con mescola elastomerica reticolata G18 con guaina speciale termoplastica, barriera ignifuga nastro mica/vetro, tensione nominale 0,6/1 kV, a bassissima emissione di fumi e gas tossici CEI 20-38, non propagante l'incendio e la fiamma conforme EN 60332-1-2, EN 50399 e ai requisiti della Normativa Europa Regolamento UE 305/2011- Prodotti da Costruzione CPR (classe B2ca-s1a, d1, a1) e alle norme CEI UNEL 35016, classe B2ca-s1a,d1,a1: pentapolare FTG18OM16: sezione 4 mmq *Flexible cable, insulated with G18 cross-linked elastomeric compound with special thermoplastic sheathing, fire retardant barrier mica/glass tape, rated voltage 0.6/1 kV, very low smoke and toxic gas emission CEI 20-38, fire- and flame-retardant in accordance with EN 60332-1-2, EN 50399 and the requirements of Europe Regulation EU 305/2011- Construction Products CPR (class B2ca-s1a, d1, a1) and CEI UNEL 35016 standards, class B2ca-s1a,d1,a1: pentapolar FTG18OM16: cross-section 4 sq. mm.* **euro**	m	
Nr. 25 025070l	Canale in acciaio zincato con processo Sendzimir, conforme UNI EN 10346, lunghezza del singolo elemento 3 m, a fondo cieco o forato coperchio escluso, compresi accessori di fissaggio: sezione 400 x 100 mm, spessore 12/10 *Cable tray made of galvanized steel by Sendzimir process, conforming to UNI EN 10346, length of single element 3 m, blind bottom or perforated cover excluded, including fixing accessories: section 400 x 100 mm, thickness 12/10* **euro**	m	
Nr. 26	Canale in acciaio zincato con processo Sendzimir, conforme UNI EN 10346, lunghezza del singolo elemento 3 m, a fondo cieco o		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
025070m	forato coperchio escluso, compresi accessori di fissaggio: sezione 500 x 100 mm, spessore 12/10 *Cable tray made of galvanized steel by Sendzimir process, complying with UNI EN 10346, length of single element 3 m, blind bottom or perforated cover excluded, including fixing accessories: section 500 x 100 mm, depth 12/10.* **euro**	m	
Nr. 27 025093b	Setto separatore in acciaio zincato con processo Sendzimir, conforme UNI EN 10346, in elementi dello spessore di 8/10 mm preforati, per canale di altezza: 100 mm *Separator of galvanized steel by Sendzimir process, conforming to UNI EN 10346, in pre-drilled elements of 8/10 mm width, for channel height: 100 mm* **euro**	m	
Nr. 28 025162fA	Cavidotto flessibile in polietilene a doppia parete, per canalizzazioni interrate, corrugato esternamente e liscio internamente, inclusi manicotti di giunzione e selle distanziali in materiale plastico, conforme norme CEI EN 50086, con resistenza allo schiacciamento > 750 N, escluse tutte le opere provvisionali e di scavo, Ø esterno: 110 mm *Flexible double-wall polyethylene conduit, for underground conduits, corrugated externally and smooth internally, including junction sleeves and plastic spacer saddles, conforming to CEI EN 50086 standards, with crush strength > 750 N, excluding all provisional works and earthworks, external Ø: 110 mm* **euro**	m	
Nr. 29 025162hA	Cavidotto flessibile in polietilene a doppia parete, per canalizzazioni interrate, corrugato esternamente e liscio internamente, inclusi manicotti di giunzione e selle distanziali in materiale plastico, conforme norme CEI EN 50086, con resistenza allo schiacciamento > 750 N, escluse tutte le opere provvisionali e di scavo, Ø esterno: 160 mm *Flexible double-wall polyethylene conduit, for underground conduits, corrugated externally and smooth internally, including junction sleeves and plastic spacer saddles, conforming to CEI EN 50086 standards, with crush strength > 750 N, excluding all provisional works and earthworks, external Ø: 160 mm* **euro**	m	
Nr. 30 025162iA	Cavidotto flessibile in polietilene a doppia parete, per canalizzazioni interrate, corrugato esternamente e liscio internamente, inclusi manicotti di giunzione e selle distanziali in materiale plastico, conforme norme CEI EN 50086, con resistenza allo schiacciamento > 750 N, escluse tutte le opere provvisionali e di scavo, Ø esterno: 200 mm *Flexible double-wall polyethylene conduit, for underground conduits, corrugated externally and smooth internally, including junction sleeves and plastic spacer saddles, conforming to CEI EN 50086 standards, with crush strength > 750 N, excluding all provisional works and earthworks, external Ø: 200 mm* **euro**	m	
Nr. 31 025218a	Allacciamento di utenza monofase incluso conduttore di protezione, con utilizzo di cavo unipolare o multipolare in guaina protettiva di pvc flessibile, provvista di raccordi filettati e di adattatori alle estremità, lunghezza fino a 1,5 m: sezione conduttori da 1,5 a 4 mmq *Single-phase utility connection including protective conductor, with use of single-core or multi-core cable in flexible pvc protective sheath, provided with threaded fittings and adapters at ends, length up to 1.5 m: conductor cross-section 1.5 to 4 sq. mm* **euro**	cad	
Nr. 32 025219c	Allacciamento di utenza trifase incluso conduttore di neutro e di protezione, con utilizzo di cavo unipolare o multipolare isolato in EPR posato in guaina protettiva di pvc flessibile, provvista di raccordi filettati e di adattatori alle estremità, lunghezza fino a 1,5 m: sezione conduttori da 25 a 35 mmq *Three-phase utility connection including neutral and protective conductor, using single-core or multi-core EPR-insulated cable laid in flexible pvc protective sheath, provided with threaded fittings and adapters at the ends, length up to 1.5 m: conductor cross-section 25 to 35 sq. mm* **euro**	cad	
Nr. 33 075003f	Corda in rame nudo, in opera completa di morsetti e capicorda, posata: interrata entro scavo predisposto: sezione nominale 50 mmq *Bare copper rope, in place complete with clamps and lugs, laid: underground within excavation prepared: nominal section 50 mmq* **euro**	m	
Nr. 34 075003ja	Corda in rame nudo, in opera completa di morsetti e capicorda, posata: interrata entro scavo predisposto: sezione nominale 240 mmq *Bare copper rope, in place complete with clamps and lugs, laid: underground within excavation prepared: nominal section 240 mmq* **euro**	m	
Nr. 35 075016c	Barra equipotenziale industriale nuda, con viteria in acciaio inossidabile per serraggio capicorda, installata a muro completa di isolatori in duroplastico ed accessori di fissaggio: in acciaio inossidabile, dimensioni: 430 x 40 x 5 mm, per 10 collegamenti *Bare industrial equipotential bar, with stainless steel screws for clamping lugs, wall mounted complete with duroplastic*		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	insulators and fixing accessories: stainless steel, dimensions: 430 x 40 x 5 mm, for 10 connections **euro**	cad	
Nr. 36 075026b	Dispersore in acciaio ramato del tipo prolungabile, lunghezza 1,5 m, spessore rame 100 micron, completo di morsetto di allaccio, puntale, e testa di battuta alloggiato in pozzetto di materiale plastico delle dimensioni esterne di 400 x 400 x 400 mm, comprensivo dello scavo e del rinterro per la posa di quest'ultimo: Ø 25 mm *Copper-plated steel sink of the extendable type, length 1.5 m, copper thickness 100 microns, complete with connection clamp, tip, and stop head housed in a plastic well with external dimensions of 400 x 400 x 400 mm, including excavation and backfilling for the latter: Ø 25 mm* **euro**	cad	
Nr. 37 075028c	Pozzetto in materiale plastico, completo di chiusino carrabile, incluso lo scavo ed il rinterro, delle dimensioni esterne di: 400 x 400 x 400 mm *Plastic cockpit, complete with manhole cover, including excavation and backfilling, with external dimensions of: 400 x 400 x 400 mm* **euro**	cad	
Nr. 38 075029	Cartello in alluminio per segnalare le prese di terra a sfondo blu, dimensioni 200 x 300 mm, inclusi gli accessori di fissaggio *Aluminium sign to indicate ground sockets with a blue background, dimensions 200 x 300 mm, including fixing accessories* **euro**	cad	
Nr. 39 095101c	Cavo UTP non schermato, multicoppie, conduttori in rame 24 AWG, conforme ISO-IEC 11801, installato in canalina o tubazione, queste escluse: 4 coppie, guaina in LSZH, cat. 6, classe di reazione al fuoco Cca *Unshielded UTP cable, multi-pair, 24 AWG copper conductors, ISO-IEC 11801 compliant, installed in duct or pipe, excluding: 4 pairs, LSZH sheath, cat. 6, reaction to fire class Cca* **euro**	m	
Nr. 40 095113	Attestazione di cavo UTP o FTP 4 coppie su connettore RJ45 cat. 6 conforme ISO IEC 11801 questo incluso *Attestation of UTP or FTP cable 4 pairs on RJ45 connector cat. 6 ISO IEC 11801 compliant this included* **euro**	cad	
Nr. 41 095127a	Presa modulare 8 pin tipo RJ45, in ABS: installata in scatola da parete o da incasso, completa di supporto e placca in resina: cat. 6, per cavi UTP *Modular socket 8 pin type RJ45, in ABS: installed in wall or recessed box, complete with support and resin plate: cat. 6, for UTP cables* **euro**	cad	
Nr. 42 095134f	Patch-cord realizzata in cavo 4 coppie, conduttori in rame 24AWG e connettori RJ45, conforme alla normativa ISO /IEC 11801 e EIA/TIA 568 C2-1, lunghezza: 200 cm, U/UTP categoria 6 *Patch-cord made of 4-pair cable, 24AWG copper conductors and RJ45 connectors, compliant with ISO / IEC 11801 and EIA / TIA 568 C2-1, length: 200 cm, U/UTP category 6* **euro**	cad	
Nr. 43 095134h	Patch-cord realizzata in cavo 4 coppie, conduttori in rame 24AWG e connettori RJ45, conforme alla normativa ISO /IEC 11801 e EIA/TIA 568 C2-1, lunghezza: 300 cm, U/UTP categoria 6 *Patch-cord made of 4-pair cable, 24AWG copper conductors and RJ45 connectors, ISO / IEC 11801 and EIA / TIA 568 C2-1 compliant, length: 300 cm, U/UTP category 6* **euro**	cad	
Nr. 44 095144i	Accessori per armadio standard 19", base 600 mm, profondità 600 mm: pannello passacavo in acciaio verniciato per il passaggio di cavi nella zona frontale *Accessories for standard cabinet 19", base 600 mm, depth 600 mm: painted steel cable entry panel for the passage of cables in the front area* **euro**	cad	
Nr. 45 095145c-A	Pannello di permutazione modulare, cablaggio universale, con telaio per armadio da 19", completo di porte per cavi UTP o FTP: con 24 porte tipo RJ45 cat. 6, per cavi UTP. Compreso cablaggio e numerazione prese. *Modular permutation panel, universal wiring, with 19" cabinet frame, complete with UTP or FTP cable ports: with 24 RJ45 ports cat. 6, for UTP cables.* *Including wiring and socket numbering.* **euro**	cad	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 46 095164	Certificazione di cavi e componenti di reti lan, con rilascio di report dettagliato per ogni tratta misurata, secondo norme ISO IEC 11801, EN 50173 classi C, D, E, F e TIA 568B CAT. 3, 5, 5E, 6 e 7; valutata per ogni tratta misurata *Certification of cables and components of LAN networks, with detailed report for each section measured, according to ISO IEC 11801, EN 50173 classes C, D, E, F and TIA 568B CAT. 3, 5, 5E, 6 and 7; evaluated for each measured section* **euro**	cad	
Nr. 47 115004g	Trasformatore trifase in resina, classe F tensione secondaria 400/230 V, morsetti di regolazione ± 2 x 2,5%, esecuzione conforme secondo le normative vigenti: tensione primaria 17.5 kV: potenza 400 kVA *Three-phase resin transformer, class F secondary voltage 400/230 V, regulation terminals ± 2 x 2.5%, execution according to current regulations: primary voltage 17.5 kV: power 400 kVA* **euro**	cad	
Nr. 48 115006c	Accessori per trasformatori: termosonda completa di relè, alimentazione 230 V - 50 Hz *Accessories for transformers: thermoprobe complete with relay, power supply 230 V - 50 Hz* **euro**	cad	
Nr. 49 115006d	Accessori per trasformatori: centralina termometrica digitale con esclusione delle resistenze *Accessories for transformers: digital thermometric control unit with exclusion of resistances* **euro**	cad	
Nr. 50 115006g	Accessori per trasformatori: sistema di ventilazione forzata, per aumento della potenza nominale fino al 40%, per trasformatori di potenza non superiore a 1000 kVA, senza centralina di comando *Accessories for transformers: forced ventilation system, for increase of nominal power up to 40%, for transformers with a power not exceeding 1000 kVA, without control unit* **euro**	cad	
Nr. 51 115037b	Cofano contenimento trasformatore completo di cavo per interconnessione 3 m sez. 25 mmq (trasformatore escluso): per trafo fino a 400 kVA *Transformer containment hood complete with cable for interconnection 3 m sect. 25 mmq (transformer excluded): for transformer up to 400 kVA* **euro**	cad	
Nr. 52 125001b	Condensatori trifase per rifasamento industriale in bassa tensione, dielettrico in polipropilene metallizzato autorigenerabile, resistenze di scarica ed induttanze di smorzamento incorporate, collegamento interno a triangolo, dispositivo interno di sicurezza di protezione a sovrapressione, involucro esterno in materiale plastico autoestinguente con grado di protezione IP 40 del tipo modulare, conformità norme IEC 831-1/2: tensione nominale 230 V / 50 Hz: potenza reattiva 10 kVAR *Three-phase capacitors for industrial power factor correction in low voltage, self-regenerating metallized polypropylene dielectric, built-in discharge resistors and damping inductors, internal triangle connection, internal overpressure protection safety device, outer casing in self-extinguishing plastic material with IP 40 degree of protection of the modular type, compliance with IEC 831-1/2 standards: nominal voltage 230 V / 50 Hz: 10 kVAR reactive power* **euro**	cad	
Nr. 53 125006g	Quadro automatico di rifasamento per bassa tensione, tensione nominale 400 V/ 50 Hz trifase, completo di regolatore automatico per inserzione di batterie di rifasamento a gradini tramite contattori, sistema di misura varmetrico da trasformatore amperometrico, sezionatore generale e fusibili di protezione, condensatori trifase con dielettrico in polipropilene metallizzato autorigenerabile, resistenze di scarica incorporate e dispositivo di sicurezza di protezione a sovrapressione, contenitore in lamiera di acciaio preverniciata alle polveri epossidiche, grado di protezione IP 30, conformità norme CEI EN 60831-1/2 e CEI EN 60439-1: potenza reattiva 45 kVAR (6 gradini) *Automatic power factor correction panel for low voltage, nominal voltage 400 V / 50 Hz three-phase, complete with automatic regulator for insertion of step power factor correction batteries through contactors, varmetric measuring system from amperometric transformer, main disconnector and protection fuses, three-phase capacitors with self-regenerating metallized polypropylene dielectric, built-in discharge resistors and overpressure protection safety device, container in steel sheet pre-painted with epoxy powders, degree of protection IP 30, compliance with CEI EN 60831-1/2 and CEI EN 60439-1: reactive power 45 kVAR (6 steps)* **euro**	cad	
Nr. 54 145025d	Cavo antincendio schermato FG29OHM16, tensione nominale 100/100 V, isolamento in mescola termoplastica di qualità G29, conduttore interno in rame rosso ricotto in classe 5, schermo con nastro Al/Pet, guaina esterna in mescola LSZH di qualità M16, a bassa emissione di di fumi e gas tossici secondo EN 61034, non propagante l'incendio e la fiamma conforme EN 60332, EN 50399 e ai requisiti della Normativa Europea Regolamento UE 305/2011 - Prodotti da Costruzione CPR, classe Cca - s1b,d1,a1, resistenza al fuoco PH 120 secondo norma CEI EN 50200: 2 x 1,5 mmq *Shielded fire cable FG29OHM16, nominal voltage 100/100 V, insulation in G29 quality thermoplastic compound, inner conductor in red annealed copper in class 5, screen with Al/Pet tape, outer sheath in LSZH compound of quality M16, low emission of fumes and toxic gases according to EN 61034, non-propagating fire and flame according to EN 60332, EN 50399 and the requirements of the European Standard EU Regulation 305/2011 - CPR Construction Products, class Cca - s1b,d1,a1, fire resistance PH 120 according to CEI EN 50200: 2 x 1,5 mmq*

	euro	m	
Nr. 55 145027e	Cavo antincendio EVAC - FTS29OM16, tensione nominale 100/100 V, isolamento in vetro-mica e guaina in mescola LSZH qualità S29, conduttore interno in rame rosso ricotto in classe 5, guaina esterna in mescola LSZH di qualità M16, a bassa emissione di di fumi e gas tossici secondo EN 61034, non propagante l'incendio e la fiamma conforme EN 60332, EN 50399 e ai requisiti della Normativa Europea Regolamento UE 305/2011 - Prodotti da Costruzione CPR, classe Cca-s1b,d1,a1, resistenza al fuoco PH 120 secondo norma CEI EN 50200: 2 x 2,5 mmq *EVAC fire cable - FTS29OM16, nominal voltage 100/100 V, glass-mica insulation and sheath in LSZH compound quality S29, inner conductor in annealed red copper in class 5, outer sheath in LSZH compound of quality M16, with low emission of fumes and toxic gases according to EN 61034, non-propagating fire and flame according to EN 60332, EN 50399 and the requirements of the European Standard EU Regulation 305/2011 - CPR Construction Products, class Cca-s1b,d1,a1, fire resistance PH 120 according to CEI EN 50200: 2 x 2.5 mmq*		
	euro	m	
Nr. 56 155050a	Gruppo di continuità assoluta modulare, con scomparto batterie e accumulatori ermetici stazionari al piombo in dotazione, valore convenzionale del fattore di potenza cosfi pari a 0,8, caratteristiche nominali della tensione in ingresso uguali a quelle di uscita, tipo "COB" monofase 230 V, tecnologia PWM ad alta frequenza, by-pass automatico, con frequenza 50/60 Hz, stabilità di tensione pari a 1%, compresa l'attivazione dell'impianto: potenza nominale 3750 VA (espandibile massimo 5000 VA), potenza attiva 2625 W (espandibile 3500 W): autonomia all'80% 15 minuti		
	euro	cad	
Nr. 57 155056c	Gruppo di Continuità Assoluta modulare tipo "COB", 400 V/50 Hz trifase, potenza apparente da 10 a 30 kVA, tecnologia PWM ad alta frequenza, inverter 3 livelli IGBT, by-pass automatico, frequenza 50/60 Hz; con scomparto batterie incorporato o con armadio separato e accumulatori stazionari al piombo tipo VRLA in dotazione, valore convenzionale del fattore di potenza cosfi pari a 1, caratteristiche nominali della tensione in ingresso uguali a quelle di uscita, stabilità di tensione pari a 1%, display e tastiera multifunzione per monitoraggio e comando UPS, compresa l'attivazione dell'impianto: con scomparto batterie incorporato: potenza apparente nominale 10 kVA, autonomia all'80% della potenza nominale 15 minuti. *UPS, 400 V/50 Hz three-phase, apparent power from 10 to 30 kVA, high frequency PWM technology, 3-level IGBT inverter, automatic by-pass, frequency 50/60 Hz; with built-in battery compartment or with separate cabinet and VRLA-type stationary lead-acid accumulators supplied, conventional cosfi power factor value of 1, nominal input voltage characteristics equal to output voltage, voltage stability of 1%, display and multifunction keypad for UPS monitoring and control, including system activation: with built-in battery compartment: nominal apparent power 10 kVA, autonomy at 80% of nominal power 15 minutes*		
	euro	cad	
Nr. 58 235029aA	Cavo ottico multimodale OM3 tipo loose monotubo per interni/esterni con riempitivo in gel (gel filled), guaina in PE: 4 fibre armatura dielettrica antiroditore. *OM3 multimode optical cable type loose monotube for indoor/outdoor with gel filler, PE sheath: 4 fibers dielectric anti-rodent armature*		
	euro	m	
Nr. 59 N.P.E 01-BMS	Fees for electrical connection of BMS control panels (supply by mechanical systems contractor) to which are referred the connection of field supervision of mechanical and electrical systems including: - take-over of the delivered material by the mechanical contractor - charges for installation and wall fastening of the control panel in question (positioning as per the electrical/mechanical drawings) with related fastening accessories and fittings; - derivation from cable conduit in PVC pipe, flexible marked, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP55 fittings; - junction box (round or rectangular) for fixing device to be mounted on wall in easily accessible position IP55 utility-side terminal; - Equipotential connections; - label to identify the arrangement itself; Complete with all accessories and charges to give the connection finished and functioning in a state of good working order.		
	euro	a corpo	
Nr. 60 N.P.E 01- BT	Supply and installation of indoor crimp type heat shrinkable terminal, with double bolt connection hole, single-pole with extruded insulation for high power LV conductors, conductor section 185-300 mm². All as visible on the project plans and with the technical specifications expressed in the "Special Tender Specifications." Including all wiring, braid grounding, labels, accessories and charges; all fully functional according to applicable standards.		
	euro	cadauno	
Nr. 61 N.P.E 01-CA	Card reader for access control system. Supply and installation of 13.56Mhz Badge Reader for HID Class cards - Secure Read only - TTL interface with 37bit Wiegand Output - IP66 outdoor protection for access control system Including: - PVC pipe, flexible branded, heavy duty, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on the wall in an easily accessible position IP55 utility-side terminal;		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- branch share in shielded type cable suitable for security systems type Belden AWG22 (to be verified exact type with system manufacturer) incoming from zone access control unit; - label identifying the arrangement unit itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 62 N.P.E 01- CL	Supply and installation of Outdoor light control point by **on/off button**. Realization of outdoor light control point, composed of: - outdoor box for wall mounting for modular fixtures 3 places; - fixture holder frame 3 places; - finishing plate 3 places; - no. 1 push button 1NA, 10A - rigid pvc pipe diam. 25mm laid exposed, threaded with FG16OM16 3G2.5mmq conductors, including suitable junction box. Including share of rigid PVC pipe and completion accessories. Complete with all accessories and charges to give the light control point finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 63 N.P.E 01- HW/TVCC	Camera Recording Server. Supply and installation of Camera Recording Server; Pc RACK 19' format with dual power supply. Minimum features i7 processor, 16GB RAM, 2x240GB RAID1 SSD, 8x4TB RAID1, Windows Server 2019, 4 Gigabit ret cards. Included in the offer is accessory for installation in Rack cabinet (Slide Rack Rail for Recording Server). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 64 N.P.E 01- LF	Supply and installation of waterproof LED ceiling fixture, IP66, with polycarbonate body and diffuser. For ceiling, wall and pendant mounting. PC diffuser with internal prism structure. With symmetrical wide-beam light distribution. Glare rating according to UGR < 25 classification (EN 12464-1). Luminaire luminous flux 6000 lm, power consumption 44.00 W. Color of light neutral white, color temperature (CCT) 4000 K, general color rendering index (CRI) Ra > 80. Polycarbonate luminaire body. Luminaire body color light gray (RAL 7035). With clampless closing technique for easy mounting suitable for the degree of protection of cover diffusers and luminaire bodies after connection. Dimensions (W x D): 1552 mm x 102 mm, luminaire height 91 mm. Degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262. Reference on plan **LF01** (installations mainly in technical areas). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 65 N.P.E 01- LFO	Supply and installation of outdoor pole head luminaire comprising high-efficiency lens systems in quadruple heat-resistant and UV-resistant arrangement. With asymmetrical wide-beam light distribution. For street lighting complying with M5 and M6 lighting classes with a road width to light spot height ratio of 0.4 to 0.8. LED system consisting of 18 MLT LED modules with 4 LEDs each. Luminaire luminous flux 18000 lm, power consumption 135.00 W, luminaire brightness 133 lm/W. Light color neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Die-cast aluminum luminaire body. Anthracite color, similar metallic, high weather resistance, powder coated. With PMMA cover lens, molded. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating to IEC 62262: IK09. With digital dimming transformer (DALI). 10 kV overvoltage resistance. Includes: - No. 1 Fixture pole fastener made of die-cast aluminum. - No. 1 Conical pole made of standard galvanized sheet metal work (10mt height) complete with heat-shrink sleeve mounted to the pole joint, large door for 186x46 slot and large terminal block for 186x46 slot with 1 fuse Reference on plan **LFO01** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 66 N.P.E 01- MT	Single-core pre-terminated three-core RG26H1M16X rigid cable insulated with ethylene propylene rubber, operating temperature 105° LS0H, operating voltage 18 kV - 30 kV: cross-section 3x1x300mmq **euro**	m	
Nr. 67 N.P.E 01- NOTE	INTRODUCTION The quantities of materials indicated in the BOQ are to be considered approximate and must be checked by the Firm at the time of tender. It is understood that the acceptance of said quantities by the Firm entails the obligation to execute the installations as designed without the possibility of requesting in the course of the work variants for more supplies unless these have been expressly requested in the course of the work by the Client. The prices used to compose the following metric statement, were taken from: - Average market prices (N.P.E) - Specific bids from type suppliers - Electrical installations information price list version December 2022 The list of materials below must be completed by the Tender Company by filling in:		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	1. the column of unit prices, which will be used as unit prices in the accounting of any additional works and for any deductions in the case of partially completed works; 2. the column of total costs resulting from the product quantity by unit price. However, it should be recalled once again that the installation is to be considered contracted on a forfeit price basis. **euro**	a corpo	
Nr. 68 N.P.E 01- PL	Realization of **normal indoor lighting point** in exposed execution from ceiling/wall/recessed, consisting of: - portion of power cable FG16OM16 laid in rigid and/or flexible PVC piping laid in cable duct and derivation from the latter with rigid and/or flexible PVC piping - PVC pipe medium series rigid and/or flexible (according to the placement of the light fixture) diamento 20mm ; - junction box - fittings and completion accessories All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 69 N.P.E 01- PZ	Supply and installation of CAV manhole 80x80x80cm, with concentric moldings pre-strained on the vertical walls and removable bottom composed of: - Connection manhole made of prefabricated vibrated concrete elements with lateral indentations for pipe inlets, placed on site including all labor and measures for watertight connection of pipes, etc., including excavation, backfill with concrete and backfill; pedestrian, not diaphragmatic (dim.80x80x80 cm); - Inspection manhole (dimensions 80x80 and nominal net span: 75 x 75 cm, driveway type) made of spheroidal cast iron in accordance with UNI EN 1563 not hydraulic tightness for sidewalks, pedestrian areas, motor vehicle parking areas and multi-storey parking lots, with breaking strength greater than 125 kN complying with class B 125 of UNI EN 124 and regulation NF-110, with vertical periphery frame without protrusions and square cover with non-slip pedestrian surface and blind hole with bar for easy opening, coated with protective paint, marking showing the strength class, reference standard, manufacturer's identification and product quality mark issued by independent certification body. Assembled on site including all labor and supplies on pre-existing manhole - Extensions for vibrated manhole on site including all labor and installation for ground connection; **euro**	cad	
Nr. 70 N.P.E 01- QE	**MV-SES.S1** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 71 N.P.E 01- RIC	Supply and installation of Master Charging Station for Electric Vehicles, No. 2 charging sockets Type 2 with automatic socket lock, according to IEC 61851-1, configurable power from 2.3 kW (10A 230V) to 22 kW (32A 400V) for each socket, integrated load management function, integrated 6mA DC differential, intelligent charging station with optional management system, ground installation. Included in the offer is: - electric vehicle charging station - ground installation using mounting pole included in the scope of supply, complete with mounting accessories - compliance with Mode 3 CEI EN 61851 - no. 2 Type 2 charging sockets according to IEC 62196-2 with automatic socket locking - single-phase 230V 32A power supply (maximum deliverable power 7.4 kW) or three-phase 400V 32A power supply (maximum deliverable power 22 kW) (one dedicated power line for each socket) - configurable current with DIP switch on each socket: 10A, 13A, 16A, 20A, 25A, 32A - configurable smart features (free access, controlled access with RFID, monitoring with management system, load management) - prepared for optional connection to EMOBITALY management system (integrated GSM modem and sim-card included) - manages up to 15 Slave charging sockets - integrated DC ground-fault current control greater than 6mA - dimensions 1'400 x 370 x 240 mm - weight approx. 25 kg. - degree of protection IP54 - indication of charging status to the user through LED indicator and display showing energy (kWh) delivered - operating temperature range of -25°C to +50°C - CE certification - 24-month guarantee All inclusive of all accessories and charges to give the system finished and functioning in a state of perfection. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 72 N.P.E 01a-CL	Supply and installation of Outdoor light control point by **on/off switch**. Realization of outdoor light control point, composed of: - outdoor box for wall mounting for modular fixtures 3 places; - fixture holder frame 3 places; - finishing plate 3 places; - no. 1 switch 1NA, 10A - rigid pvc pipe diam. 25mm laid exposed, threaded with FG16OM16 3G2.5mmq conductors, including suitable junction box. Including share of rigid PVC pipe and completion accessories. Complete with all accessories and charges to give the light control point finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 73 N.P.E 01A-MT	Single-core pre-terminated three-core RG26H1M16X rigid cable insulated with ethylene propylene rubber, operating temperature 105° LS0H, operating voltage 18 kV - 30 kV: cross-section 3x1x240mmq **euro**	m	
Nr. 74 N.P.E 02-BMS	Realization on site of equipment connection BMS regulation system , composed mainly of: - control valves / dampers on air ducts (servomotors); - motorized dampers - temperature / humidity / pressure and flow rate probes - pressure switches - equipment status / alarm contacts - serial / ethernet / bacnet / modbus interfaces, etc. for AHU / CRAC / UPS / GE / etc.; - meters / power meters - realization BUS communication between the switchboards of the BMS control system. All as visible on the functional diagram attached to the project of mechanical and electrical systems, points list and technical description in the tender documents. Including supply and installation of threading conduits and suitable conductors with connectors for power and signal of all listed equipment, as per the points list attached to the Technical Report of the project. Including all accessories and charges necessary to give the connections in place finished and functional. **euro**	a corpo	
Nr. 75 N.P.E 02-HW/TVCC	Camera Recording Server - Failover Supply and installation of Camera Recording Server - Failover server intended use; Pc RACK 19' format with dual power supply. Minimum features i7 processor, 16GB RAM, 2x240GB RAID1 SSD, 8x4TB RAID1, Windows Server 2019, 2 Gigabit network cards. It is included in the offer accessory for installation in Rack cabinet (Slide Rack Rail for Failover Server). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 76 N.P.E 02-LFO	Supply and installation of outdoor pole head luminaire comprising high-efficiency lens systems in quadruple heat-resistant and UV-resistant arrangement. With asymmetrical wide-beam light distribution. For street lighting complying with M5 and M6 lighting classes with a road width to light spot height ratio of 0.4 to 0.8. LED system consisting of 18 MLT LED modules with 4 LEDs each. Luminaire luminous flux 13500 lm, power consumption 105.00 W, luminaire brightness 128 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Die-cast aluminum luminaire body. Anthracite color, similar metallic, high weather resistance, powder coated. With PMMA cover lens, molded. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating to IEC 62262: IK09. With digital dimming transformer (DALI). 10 kV overvoltage resistance. Includes: - No. 1 Die-cast aluminum fixture pole mount. - No. 1 Conical pole made of standard galvanized sheet metal work (10mt height) complete with heat-shrink sleeve mounted to the pole joint, large door for 186x46 slot and large terminal block for 186x46 slot with 1 fuse Reference on plan **LFO02** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 77 N.P.E 02-NOTE	NOTE All prices are considered to include charges for the production of Construction Drawings Documentation: - Fees for the production of construction documentation, to be delivered to the DL in computer copy prior to execution of the work. Documentation must include coordination between architectural, electrical and structural drawings. - Fees for the production of electrical system construction drawings including dimensions of fixtures, conduits,lighting fixture traces, overlap with other ceiling electrical systems, electrical switchboard schematics, installation dimensions and technical characteristics of components to be installed. **euro**	a corpo	
Nr. 78 N.P.E 02-ON	Realization on site of labeling of all components of electrical and special installations with durable materials specifically provided for the material to be tagged. Labeling shall include all installed materials (e.g., electrical panels, cabinets, all cables, catwalks, receptacles, detectors, etc.), no " by		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	hand" labeling will be allowed, coding will be defined during work in progress. Including supply and installation of suitable accessories for fixing **euro**	a corpo	
Nr. 79 N.P.E 02- PZ	Supply and installation of CAV manhole 60x60x60cm, with concentric moldings pre-strained on the vertical walls and removable bottom composed of: - Connection gully made of precast vibrated concrete elements with lateral indentations for pipe inlets, placed on site including all labor and supplies for watertight connection of pipes, etc., including excavation, backfill with concrete and backfill; pedestrian, not diaphragmatic (dim.60x60x60 cm); - Inspection manhole (dimensions 60x60x60) and nominal net span: 55 x 55 cm, driveway type) made of spheroidal cast iron in accordance with UNI EN 1563 not hydraulic tightness for sidewalks, pedestrian areas, motor vehicle parking areas and multi-storey parking lots, with breaking strength greater than 125 kN complying with class B 125 of UNI EN 124 and regulation NF-110, with vertical periphery frame without protrusions and square cover with non-slip pedestrian surface and blind hole with bar for easy opening, coated with protective paint, marking showing the strength class, reference standard, manufacturer's identification and product quality mark issued by independent certification body. Assembled on site including all labor and supplies on pre-existing manhole - Extensions for vibrated manhole on site including all labor and installation for ground connection; **euro**	cad	
Nr. 80 N.P.E 02- QE	**MDB-EXT.X-1** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 81 N.P.E 02- REI	Supply and installation restoration of walkway crossing on flush and / or non-flush wall holometry, made by applying fireproof bearings positioned above the cable tray by placing the certified side of 120 mm parallel to the wall thickness and sealed with water-based fire sealant that guarantees a perfect seal to smoke and flames. This system is designed to quickly seal cable tray crossings inserted into slots larger than the size of the walkways. Restoring will ensure the degree of protection:- EI 120 on hard wall not flush min. 125 mm for cable trays dimensions up to 600x100 mm- EI 120 on rigid wall flush min. 135 mm for cable trays dimensions up to 500x100 mmThe work will be supplied complete with identification plate, applied in a legible position, with identification of the intervention, date of execution and certification details. Restoration by crossing No. 1 cable tray or group of walkways adjacent to each other.For the precise identification of the restoration points, consult the project tablesIncluding assistance and drafting of fire prevention documentation and the compilation of the form and CERT REI certification, drawn up by a qualified technician and registered in the former register 818 as well as accessory elements of completion to give the work complete and functioning. **euro**	cadauno	
Nr. 82 N.P.E 02- RIC	Supply and installation of SLAVE Charging Station for electric vehicles, no. 2 charging sockets Type 2 with automatic socket lock 5, according to IEC 61851-1, configurable power from 2.3 kW (10A 230V) to 22 kW (32A 400V) for each socket, integrated load management function, integrated 6mA DC differential, intelligent charging station with optional EMOBITALY management system, ground installation. Included in the offer is: - electric vehicle charging station - ground installation by means of mounting pole included in the supply, complete with mounting accessories - compliance with Mode 3 CEI EN 61851 - no. 2 charging sockets Type 2 according to IEC 62196-2 with automatic socket locking; - single-phase 230V 32A (maximum deliverable power 7.4 kW) or three-phase 400V 32A (maximum deliverable power 22 kW) power supply (one dedicated power line for each socket); - configurable current with DIP switch on each socket: 10A, 13A, 16A, 20A, 25A, 32A - configurable smart features (free access, controlled access with RFID, monitoring with management system, load management) managed by Master socket - prepared for optional connection to EMOBITALY management system (through Master socket) - ground fault current control in direct current greater than 6mA integrated - dimensions 1'400 x 370 x 240 mm - weight approx. 25 kg. - degree of protection IP54 - indication of charging status to the user through LED indicator and display showing energy (kWh) delivered - operating temperature range of -25°C to +50°C - CE certification - 24-month guarantee All inclusive of all accessories and charges to give the system finished and functioning in a state of perfection. **euro**	cadauno

Nr. 83 N.P.E 02-SPD RIBA 4	Supply and installation of surge protector for medium voltage 15kV. Supply and installation of surge arrester (single-pole) for medium voltage, according to IEC 99-4 / EN 60099-4 / ANSI/IEEE C.62 11 standards. Protective apparatus executed with FRP tube casing, covered with silicone rubber, composed of zinc oxide varistors, equipped with stainless steel M12 threaded pins for electrical connection and mechanical fastening, construction form with fins for high degree of contamination, for indoor and outdoor use Discharger in accordance with ENEL specification DY557/4 Rated voltage Ur: 18 kV Maximum continuous voltage Uc: 14.4 kV Temporary overvoltage for 1 sec UTOV: 21.0 kV Line discharge class: 1 Rated discharge current In: 10 kA (8/20 µs) High current pulse: 100 kA (4/10 µs) Residual voltage with pulse 10 kA (1/2 ms) Urss: 69.0 kV Residual voltage with pulse 10 kA (8/20 ms) Urs: 61.5 kV Residual voltage with impulse 20 kA (8/20 ms) Urs: 68.5 kV Residual voltage with shunting pulse 500 A (30/75 ms) Ursch: 44.0 kV Involute height: 245 mm Total escape line: 570 mm Weight: 3.2 kg Including mounting and connecting accessories such as: - flexible tinned copper cable sect. 50mm² for SPD MT L=500 mm - disconnection device for disconnecting the faulty arrester from the grid - insulated support, accessory for mounting the medium voltage surge arrester with disconnection device All in place, including all accessories and charges necessary to give the SPDs for medium voltage finished and working in a state of art performance. **euro**	cadauno	
Nr. 84 N.P.E 02-TD	Connection point or component preparation point structured wiring system placed on the wall for outdoor (in indoor / outdoor environments of the building) or recessed on walls / false ceiling where present composed of:- empty PVC pipe Ø25mm (rigid or flexible depending on the placement of the device);- junction box 503 (rectangular) with protection index according to the place of installation, for future insertion of RJ45 socket to be mounted inside the recessed box wall or outdoor ceiling lamp in an easily accessible position complete with protection plate;- label identifying the predisposition itself;Complete with every accessory to give the finished work and working in a workmanlike manner. **euro**	a corpo	
Nr. 85 N.P.E 02A-QE	**DB.AUX-CAB** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 86 N.P.E 02A-RI	Supply and installation of Fire Detection Control Panel, **2 loops** analog addressed in medium box complete with command and control panel with color graphic display and 24 Vdc 5 A power supply. Basically equipped to manage 2 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 2 loops = 4 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Fiber optic converter specifically for MGNET (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 VDC, absorption 35 mA @ 24 VDC, DIN rail mounting; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 87 N.P.E 03-BMS	Supply and installation of active network equipment for service of the BMS control cabinet (supplied by the mechanical systems contractor) , composed mainly of: - no.1 Cisco C9200L-24P-4X-E switch - Catalyst 9200L 24-port PoE+, 4 x 10G, Network Essentials (Access Switch); - fiber-optic attestation module for single fibers from area rack cabinets (see project functional diagram for more details); - OM4 multimode optical OM4 type LC 1 mt half harnesses. Each Switch must be complete with charges and accessories such as: - dual power supplies with associated connecting cables		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- stack modules and cables where necessary - SFP modules for copper and fiber connection (singlemode or multimode as required by the project) - suitable support brackets - labeling - user permits Charges are included for on-site programming of the equipment according to specifications to be produced by the Customer/Control System Supplier. **euro**	cadauno	
Nr. 88 N.P.E 03-CA	Outdoor push button for door opening. Supply and installation of Red mushroom button for outdoor door opening for installation near the door to be controlled. Including: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceilings (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP55 fitting; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - branch share in cable type FG16OM16 2x1.5mmq (to be verified exactly type with system manufacturer); - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 89 N.P.E 03-HVAC	Supply and installation of precision indoor unit supply complete with : - flexible PVC piping (final downward sections from cable conduit) in IP4X execution alternatively rigid PVC piping GWT 960 °C complete with fasteners and fittings for IP55 outdoor installation execution (connection section from backbone branch to utility point) and IP55 branch box on utility side. - plastic rotary disconnector with red padlockable knob on yellow flange exposed installation complete with fixing IP55 protection degree; - realization of auxiliary signal connection between indoor unit and outdoor unit (see technical specifications manufacturer of installed equipment); - realization of auxiliary signal connection (Bus) with possible centralized remote control panel; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 90 N.P.E 03-HW/TVCC	Hardware Support Contract Charges Fees for starting Hardware Support Contract on PC Server with intervention within 24H (to be coordinated with client in schedule phase) **euro**	cadauno	
Nr. 91 N.P.E 03-NOTE	NOTE: Included in all prices are charges for the production of as-built documentation, to be delivered to the client in triplicate hard copy and computer copy. The documentation should include the updating of all graphic design documentation, diagrams of all systems built, the typical connections used and the programming set in the power plants, certifications and approvals of the materials used together with the manufacturer's documentation. **euro**	a corpo	
Nr. 92 N.P.E 03- PZ	Supply and installation of CAV manhole 40x40x40cm, with concentric moldings pre-strained on the vertical walls and removable bottom composed of: - Connection gully made of precast vibrated concrete elements with side indentations for pipe inlets, placed on site including all labor and supplies for watertight connection of pipes, etc., including excavation, backfill with concrete and backfill; pedestrian, not diaphragmatic (dim.40x40x40 cm); - Inspection manhole (dimensions 40x40x40) and nominal net span: 32.5 x 32.5 cm, driveway type) made of spheroidal cast iron in accordance with UNI EN 1563 not hydraulic tightness for sidewalks, pedestrian areas, motor vehicle parking areas and multi-storey parking lots, with breaking strength greater than 125 kN complying with class B 125 of UNI EN 124 and regulation NF-110, with vertical periphery frame without protrusions and square cover with non-slip pedestrian surface and blind hole with bar for easy opening, coated with protective paint, marking showing the strength class, reference standard, manufacturer's identification and product quality mark issued by independent certification body. Assembled on site including all labor and supplies on pre-existing manhole - Extensions for vibrated manhole on site including all labor and installation for ground connection; **euro**	cad	
Nr. 93 N.P.E 03-RIC	Supply and installation MASTER Recharge Station Management System, consisting of activation of online platform for accounting of individual recharges made, real-time monitoring of the status of the recharge station, firmware update and remote maintenance. Access public optional and can be activated free of charge at any time. If public access is activated, the owner of the charging point can set the rate for paid recharges (fixed rate and/or energy-based rate and/or time-based rate). Automatic collections and payments (the owner receives a monthly transfer for all recharges for that month) INCLUDING SIM CARD data traffic. The portal can be accessed from any Internet-connected device (login and password provided with the recharge station), everything is already activated and configured and ready to use.		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	ANNUAL FEE. NOTE: The charging station contains a GSM modem and a SIM CARD, so the place of installation must be covered by GSM signal (national coverage: 99.9% of the territory). All inclusive of all accessories and charges to give the system finished and functioning in a state of perfection. **euro**	cadauno	
Nr. 94 N.P.E 03-TVCC	IP Dome camera placed outside the Building on pole. Supply and installation of IP Dome Camera (2688×1520) 1080p@30fps, True Day/Night, SLOW PTZ Motorized lens with 4X Optical zoom and autofocus (2.7/13.5mm). H.265+/H.265/H.264+/H.264 compression-WDR 120db- ONVIF certified. White color aluminum housing, transparent dome. Outdoor version for paolo installation with support bracket. Temperature range -30° / +60°C, vandal-proof IK10, IP66 degree of protection. Power supply 12VDC(±10%), POE(802.3at). Includes: - Junction Box for Mini Dome; - Bracket for outdoor MiniDome mounting on pole mount (Pole mount+wall mount); - C.T.F. containment box is composed of a switchboard containing: local switch (to allow safe maintenance), single-phase type II arrester, fuse, 230V/12V Transformer, Media Converter (the latter included in the supply) including fiber optic cable and its attestation according to the system supplier's indication; - PVC pipe, flexible marked, heavy, corrugated GWT 850 °C or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP67 fitting; - junction box (round or rectangular) for fixing device to be mounted on pole in easily accessible position IP67 utility-side terminal; - branch share in power/data cable (computed in dedicated section); - label identifying the arrangement unit itself; Reference on plan **SD10** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 95 N.P.E 03-LFO RIBA 4	Supply and installation of outdoor pole head luminaire comprising high-efficiency lens systems in quadruple heat-resistant and UV-resistant arrangement. With asymmetrical wide-beam light distribution. For street lighting complying with M5 and M6 lighting classes with a road width to light spot height ratio of 0.4 to 0.8. LED system consisting of 18 MLT LED modules with 4 LEDs each. Luminaire luminous flux 2200 lm, power consumption 20 W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Die-cast aluminum luminaire body. Anthracite color, similar metallic, high weather resistance, powder coated. With PMMA cover lens, molded. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating to IEC 62262: IK09. With digital dimming transformer (DALI). 10 kV overvoltage resistance. Includes: - No. 1 Die-cast aluminum fixture pole mount. - No. 1 Conical pole made of standard galvanized sheet metal work (5mt height) complete with heat-shrink sleeve mounted to the pole joint, large door for 186x46 slot and large terminal block for 186x46 slot with 1 fuse Reference on plan **LFO04** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 96 N.P.E 03A-RI	Fees for Configuration and start-up operations of smoke detection systems following the installation of the new control unit in the Fire Room premises provided in the following manner. Specific training meeting inherent to the work site in question, concerning exclusively: - Installation and addressing devices; -Analysis of floor plans and installation diagrams; - Provision of a dossier of supporting technical documentation. - Desk-based programming activities based on Excel tables, provided by the system manufacturer, compiled by site personnel and based on programming logic provided by the DL or client. Scheduling activities will be started only after the delivery of said documents. - Activities related to the sizing of piping afferent to the laid suction systems for their proper functioning. Further subsequent modifications will have to be analyzed and possibly quoted separately; - On-site activities for loading programming in the central unit and in the suction systems, with verification of system functionality by sample testing as per Ch.8 standard UNI 9795 ed. December 2021; - Training course in the use of the system. **euro**	a corpo	
Nr. 97 N.P.E 04-BMS RB4	Supply and installation of active network equipment for service of the BMS control cabinet (supplied by the mechanical systems contractor) , composed mainly of: - no.1 Cisco C9300 L-24 P-4X PoE, with modular uplink C9300-NM-4X. Uplink interfaces must be equipped with n.2 x 1Gb 850nm SFP Multi Mode Fiber to handle 1Gb capacity (Access Switch) - double fiber-optic attestation module for single fibers from area rack cabinets (see project functional diagram for more details); - n.2 OM4 multimode optical OM4 type LC 1 mt half harnesses. Each Switch must be complete with charges and accessories such as: - dual power supplies with associated connecting cables - stack modules and cables where necessary - SFP modules for copper and fiber connection (singlemode or multimode as required by the project) - suitable support brackets - labeling		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- user permits Charges are included for on-site programming of the equipment according to specifications to be produced by the Customer/Control System Supplier. **euro**	cadauno	
Nr. 98 N.P.E 04-MT	Supply and installation of indoor crimp type heat shrink terminals, with double hole for double bolt connection, single-pole with extruded insulation up to 30kV, conductor section 70-300 mm². All as shown on the project plans and with the technical specifications expressed in the "Capitolato Speciale d'Appalto" Including all wiring, braid grounding, labels, accessories and charges; all fully functional according to applicable standards. **euro**	cadauno	
Nr. 99 N.P.E 04- PL	Supply and installation of **light point for street lighting element**, including portion of cable FG16OR16 cable backbone and branch (section indicated in the wiring diagrams), portion of flexible heavy series polyethylene cable laid in excavation prepared from light well or adjacent lighting body, shunts in the manhole made with joints with two-component fast-cross-linking insulation for extruded cable (alternatively exposed distribution in galvanized steel piping where required), light fixture laying and connection and related accessories (transformers, ballasts, etc.), fittings and completion accessories. All inclusive of all accessories and charges to give the system finished and functioning professionally **euro**	cadauno	
Nr. 100 N.P.E 04- RI	Supply and installation of Serial Server for connecting equipment with serial line on 10 / 100 M Ethernet network, equipped with 1 RS422 / 485 serial port and 1 RS232 port. Needs power supply 12 - 48 Vac. Note: The model may vary depending on the characteristics of the proprietary BMS system. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 101 N.P.E 04-RIC	Supply and installation of Charging Station Management System SLAVE ANNUAL RATE. All inclusive of all accessories and charges to give the system finished and functioning in a state of good works. **euro**	cadauno	
Nr. 102 N.P.E 04-TVCC	IP Speed Dome Camera placed in outdoor area of the Building on pole. Supply and installation of Megapixel 1080p@30fps Autotracking Starlight Day/Night Sensor IP Speed Dome Camera - Motorized PTZ with 45x Optical Zoom and 16x Digital Zoom - Sensitivity 0.005 lux - Integrated video analysis functions with artificial intelligence algorithms- H.265+/H.265+/H.264 compression- ONVIF Profile S Certified- Preset groups, Autoscan between two points - Rotation speed 360 degrees per second - Complete with integrated high power IR Illuminators up to 200m. Operating temperature range -40° +70° - Power supply 2AC 24 V / 3 A, PoE+ (802.3at) (220V/24 power supply included). Includes: - Speed Dome Kit - Outdoor JunctionBox capacity to contain FibraConverter and power supply - Wall bracket and pole collar; - containment box C.T.E. consists of a junction box containing: local switch (to allow safe maintenance), single-phase type II arrester, fuse, 230V/24V Transformer, Media Converter (the latter included in the supply) including fiber optic cable and its attestation according to the system supplier's indication; - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, or alternatively rigid pvc piping GWT 960 °C, complete with IP67 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on pole in easily accessible position IP67 utility-side terminal; - branch share in power/data cable (computed in dedicated chapter); - label identifying the arrangement itself; Reference on plan **SD11** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 103 N.P.E 05-CA	Access control unit Supply and installation of Access Control Unit for maximum management of 4 single reader doors and/or 2 double reader doors with the following features: 4 Wiegand inputs, 4 Relays, 8 TTL inputs, 8 TTL outputs, 4 RS485 ports for door readers. 12VDC power supply. LAN communication/programming port. RS485 auxiliary port for communication/control of Slave devices on BUS. Includes: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - Customized Access Control Device Containment Box. Painted steel frame, IP54 protection, dimensions 600x400x135, Front cover via side-opening lid with universal plastic key. Panel name labeling on the front with screen printed plastic label. Box complete with protective disconnects and power supplies for electrical devices and locks. Pre-wired internal connections and pre-assembled boxes with switchboards according to design. - branch share in RS485 bus-type cable for series connection with other control units (to be verified exact type with system manufacturer); - label identifying the prewiring itself; Complete with every charge to give the component finished and functioning in a state of good working order.		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	euro	a corpo	
Nr. 104 N.P.E 05-FM	Supply and installation of IP65 outdoor service outlet point, consisting of: - No. 1 box for exposed wall-mounting for 3-person modular fixtures - No. 1 3-place socket cover with transparent spring cover IP65 - no. 1 UNEL 10/16A multistandard socket - n°1 power outlet 2-pin 10/16A - n°1 section of rigid pvc pipe diam. 25mm laid exposed to the wall, threading with FS17 2.5mmq conductors, and terminal section in sheathing up to the junction box in inspectable point of the false ceiling (this included). - Portion of backbone in FG16OM16 cable as per the single-line diagrams; Reference on plan **EF05** Complete with IP65 fittings and all accessories and charges necessary to give the IP65 outlet point finished and in working order **euro**	a corpo	
Nr. 105 N.P.E 05- FO	Attestation of fiber optic cable and relative certification on LC or SC connector, this excluded, for single fiber: 36 fibers **euro**	cadauno	
Nr. 106 N.P.E 05-HVAC	Supply and installation of outdoor unit supply point including : - rigid PVC piping complete with fasteners and fittings; - IP65 terminal junction box; - plastic rotary disconnector with red padlockable knob on yellow flange exposed installation complete with fasteners. IP 65 degree of protection - section of conduit in multi-core cable insulated with high modulus ethylpropylene rubber of G16 quality, under special thermoplastic sheath of M16 quality, halogen-free, fire-propagating and low smoke development, type FG16(O)M16 section computed in dedicated chapter; (connection section from backbone branch to user point); - realization of auxiliary signal connection between indoor unit and outdoor unit (see technical specifications manufacturer of installed equipment); - realization of auxiliary signal connection (Bus) with centralized remote control panel; - connecting pipeline to indoor unit, including Ac-Zn pipeline for outdoor distribution, IP65 degree of protection; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 107 N.P.E 05-HW/TVCC	NAS system for archiving recordings Supply and installation of NAS System for record storage (**Specifications 90g). 12 Slot module for RAID10 disks and 2 network cards. 19' RACK format with Dual Power Supply. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 108 N.P.E 05- PL	Realization Point of light for fixtures placed recessed in ceiling/wall or ceiling mounted for **emergency lighting** equipped with battery kit inverter on board of lamp and supervised by centralized diagnostic center. Realization of emergency light point in exposed execution for emergency luminaires, consisting of: - derivation share in FG16OM16 normal/preferential energy cable (section specified on the wiring diagrams) laid in cable duct and derivation from the latter with rigid and/or flexible PVC piping; - branch share in 2x0.5 mm2 twisted and shielded RS485 bus cable for communication with centralized diagnostic zone control unit; - PVC piping medium series rigid and/or flexible (depending on the placement of the light fixture) diamento 20mm ; - junction box - fittings and completion accessories All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 109 N.P.E 05- RI	Supply and installation of 24 VDC 2.5 A power supply unit. CE CPD EN54-4, A1 and A2 certified. Max. allocable battery 2 x 17 Ah 12 V. Current available for external loads 2 A distributed over two outputs. Metal case included (W355 x H375 x D110 mm). Relay outputs for general fault and power failure. Connector for connection of TLC maintenance instrument. Composed of: - No. 2 12 V 18 Ah sealed lead-acid battery. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 110 N.P.E 05-RIC	Supply and installation of Custom Graphic Panel for 2x charging stations, graphics to be agreed with client. All inclusive of all accessories and charges to give the system finished and functioning in a state of good works. **euro**	cadauno	
Nr. 111 N.P.E 05-	Supply and installation of equipotential bonding plate with copper plate, with shockproof plastic cover, nickel-plated brass terminal block, connections for 8÷10 mm diameter rod and 131x50x5mm plate, including all installation accessories.

Nr. 112 N.P.E 06-EVAC	Supply and installation of acoustic diffuser with folded horn of rectangular section, container made of self-extinguishing ABS conforming to UL94V0, with fixing bracket. Diffuser certified EN54 - 24 Degree of protection IP66. Light gray color. 100V - power settable at 7.5-15.30W rms. Impedances :333- 666-1,333 ohms sensitivity at W=1 m=1- 160 Hz-8 Khz - useful maximum usable power at 30 W rms - 120.2 dB SPL frequency response [Hz] 350-10,000 Hz dispersion angle in degrees Orizz (H) 110° x Vert (V) 55° . Dimensions H 115 x W 180 x D 235 Reference to layout **CD03** All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 113 N.P.E 06-HW/TVCC	Hard Disk 16TB Supply and Installation of Hard Disk 16TB PRO3.5 Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 114 N.P.E 06- RI	Supply and installation of 24 VDC 5 A power supply unit. CE CPD EN54-4, A1 and A2 certified. Max. 2 x 17 Ah 12 V allocable battery. Current available for external loads 4 A distributed over two outputs. Metal enclosure included (W355 x H375 x D150 mm). Relay outputs for general fault and power failure. Connector for connection of TLC maintenance instrument. Composed of: - No. 2 12 V 27 Ah sealed lead-acid battery. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 115 N.P.E 06-TER	Supply and installation of 50x5mm copper plate placed on the perimeter of the MV receiving electrical substation and perimeter of the technical rooms of the future HV/MV sub-station area, including fixing accessories and bolts. **euro**	a corpo	
Nr. 116 N.P.E 07-EVAC	Supply and installation of End of Line Load, for checking the continuity of conductors, 2-wire connection. Certified to EN54-16 standards. Dimensions mm.42.7x47.8x21.3 All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 117 N.P.E 07-HW/TVCC	Desktop PC Operator Supply and installation of Desktop PC Operator, I-7 Core, 16GB Ram, 2x240TB SO, 1x4TB HD, Nvidia Pquadro Video Card, 2 1GB network cards. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 118 N.P.E 07-LFE	Supply and installation of LED emergency lighting fixture for anti-panic area indication (equipped with symmetrical lens) for ceiling-mounted installation with the following characteristics: - Optics: standard heights - System type: (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 358lm - Battery: Ni-Cd 4.8V 1.4Ah - Battery type: Nickel cadmium - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 0.8W - Insulation class: II - Degree of protection: IP42 (from below), IP20 (from above) - Degree of protection against mechanical impact: IK07 - Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Complies with RoHS2 2011/65/EU - Installation: recessed, Reference on plan **LFE04** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 119 N.P.E 07-TVCC	Supply and installation of road armature for the installation of video surveillance cameras consisting of: - No. 1 Conical Pole in standard galvanized sheet metal processing (height 5mt) complete with heat-shrink sleeve mounted to the interlocking of the pole, hole for cable passages, large door for slot 186x46 and large terminal block for slot 186x46. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 120 N.P.E 08-CA	Outdoor Video Door Phone Station Supply and installation of IP Wall-mounted Outdoor Video Door Phone Station consisting of No. 1 Call Button, 1 Relay, API controls for integration with indoor VideoTelephone station, POE and 12VDC power supply. Includes: - Wall mounting brackets for external intercom station; - Power supply for 2-WIRE system ; - Specific unshielded BUS/SCS cable suitable for video intercom systems, consisting of a white outer sheath and 2 flexible conductors; - Cover for intercom station; - PVC pipe, flexible branded, heavy duty, corrugated GWT 850 °C, placed within masonry walls in IP6X execution or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP65 fittings; - outdoor junction box (round or rectangular) for fixing device to be mounted on wall in easily accessible position IP65 utility-side terminal; - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 121 N.P.E 08-ON	Supply and installation of safety accessories for the outdoor MV/LV transformer substation room. Includes: - insulating mat; - insulating gloves; - rigging; - powder fire extinguisher; - portable auotpowered lamp; - warning signs and first aid indication; - single-line cabin schematic; - RAEL key lock **euro**	a corpo	
Nr. 122 N.P.E 09-HVAC	Supply and installation of three-phase CDZ utility connection work up to 10kW Realization of user power supply up to 10 kW, including: - waterproof grommets for power cable entry - cable termination with suitable fastening lugs - connection to terminal board; - rotary disconnector in IP65 insulated enclosure, fixed to wall or supply profile - derivation from cable conduit in heavy series PVC piping rigid and/or flexible diameter suitable for FG16OM16 cable threading Complete with all accessories (e.g. IP65 cable glands, cable connection, etc.) and charges to make the power supply finished and working in a state of good working order. **euro**	a corpo	
Nr. 123 N.P.E 09-HW/TVCC	46 Inch LCD Monitor Supply and installation of 46 Inch LCD Monitor - 2 HDMI inputs with VESA wall bracket. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 124 N.P.E 10-LFE	Supply and installation of LED pictogram for escape route indication on door with the following characteristics: - System type: (stand-alone with centralized supervision) - Autonomy: 3h - Type: SE/SA (Emergency only, non-permanent/always on, permanent) - SA operation interruptible by switch - Battery: Ni-Cd 4.8V 0.5Ah - Battery type: Nickel cadmium - Battery charging time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 1.7W - Insulation class: II - Degree of protection: IP65 - Operating temperature: 0°C to +40°C - Visibility distance (EN 1838): 32 meters - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 1838, EN 7010		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Signaling pictogram kit provided as standard in each package - Installation: ceiling, flag, recessed*, recessed on 503 box*, suspension* (* with accessory) - Warranty 5 years Reference on plan **LFE07** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 125 N.P.E 100- QE RIBA 4	**DB-FP.A-0-1** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 126 N.P.E 101- QE RIBA 4	**DB-FP.A-0-2** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 127 N.P.E 102- QE RIBA 4	**DB-FP.B-0-1** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 128 N.P.E 103- QE RIBA 4	**DBC-GH.X-0-1** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 129 N.P.E 104- QE RIBA 4	**DB-RIC.01** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 130	**DB-RIC.02** electric switchboard		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
N.P.E 105-QE RIBA 4	Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 131 N.P.E 106-QE RIBA 4	**DB-RIC.03** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 132 N.P.E 11-CA	Pre-Arrangements for future electric lock Realization of predisposition point for future electromechanical lock (the latter calculated in civil works computation) for installation on door frame to be controlled including: - PVC pipe, flexible branded, heavy duty, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - portion of backbone FS18OR18 3x1.5 300/500V incoming from zone access control unit; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 user side terminal; - supply and installation of 230/12V transformer for connection to electric lock; - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order **euro**	a corpo	
Nr. 133 N.P.E 11-EVAC	Connection point or arrangement point evac system component consisting of: - diameter 25mm hollow pvc pipe; - junction box (round or rectangular) suitable for installation site, for fixing device to be mounted on ceiling/recessed/wall in easily accessible position; - portion of loop in fire resistant cable 2x2.5mmq PH120' FTS29OM16 100/100V, glass-mica insulation and sheathing in E4 cross-linked compound purple color conforming for emergency evacuation systems derived from the central belonging; - label identifying the arrangement same; Complete with every accessory to give the work finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 134 N.P.E 11-HVAC	Supply and installation of single-phase CDZ user connection work up to 3kW Realization of single-phase user power supply up to 3 kW, including: - waterproof grommets for power cable entry - cable termination with suitable fastening lugs - terminal block connection; - 2x16A rotary disconnect switch in IP65 insulated enclosure, fixed to wall or supply profile - derivation from cable conduit in rigid and/or flexible heavy series PVC piping diam. 32mm Complete with all accessories (e.g. IP65 cable glands, cable connection, etc.) and charges to make the power supply finished and working in a state of good working order. **euro**	a corpo	
Nr. 135 N.P.E 11-HW/TVCC	Forever License for Camera Connection. Fees for initiating Perennial License for the connection of each camera to the VMS system (Permanent License). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 136 N.P.E 12-HVAC	Supply and installation of power supply to serve the fire-fighting pumping group composed of No. 2 diesel motor pumps, electric jockey pump, in compliance with NFPA. Realization of power supply for the fire-fighting pumping unit (supply by the mechanical systems contractor), including: - waterproof grommets for power cable entry - termination of cables with suitable fastening lugs - realization of connections to the BMS system of the elements in the regulation and control field (states, alarms, consents)		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- realization of all auxiliary connections (e.g., valves, probes, thermostat, control unit, etc.) to be checked with material manufacturer; - connection to terminal board; - rotary switch disconnectors in plastic material with red padlockable knob on yellow flange exposed installation complete with fixing. IP65 degree of protection - power supply electric heaters for storage tank; - power supply electrical utilities in the room (electric motor pump etc..), power cables computed in dedicated chapter; Complete with every accessory and charge to give the power supply finished and functioning in a workmanlike manner. All with IP55 degree of protection. Power cable computed in dedicated chapter. **euro**	a corpo	
Nr. 137 N.P.E 13- FM RIBA 4	Supply and installation of management control system for opening/closing external gates to be placed inside the site guardhouse. The quotation should include: - Push button panels with pulse control keys (open/stop/close) to service driveway, pedestrian and pilomat gates; - Remote enabling system for checking operation status of gates serving pilomat, gates (the latter equipped with badge readers computed in dedicated chapter) to be interfaced with general access control system of the site; All inclusive of every accessory to allow the remote enabling of the gates by the operator inclusive also for all management systems, of signal connection cables (type and model of the cables shall be confirmed by the specifications provided by the suppliers of the gates). **euro**	a corpo	
Nr. 138 N.P.E 13- HVAC	Supply and installation of power supply water lifting stations. Realization of power supplies of water lifting stations (black/meteoric), including: - waterproof grommets for power cable entry - termination of cables with suitable fixing lugs - realization of connections to the BMS system of the elements in the regulation and control field (states, alarms, consents) - realization of all power connections (energy cables computed in dedicated chapter); - realization of all auxiliary connections (e.g., valves, probes, thermostat, control unit, etc.) to be checked with material manufacturer; - connection to terminal board; - plastic rotary disconnector with red padlockable knob on yellow flange exposed installation complete with fixing. Degree of protection IP67 Complete with every accessory and charge to give the power supply finished and working in a state of good working order. All with IP67 degree of protection. **euro**	a corpo	
Nr. 139 N.P.E 13- HW/TVCC	Annual Maintenance License Fee per camera. Start-up Charges Annual Maintenance Fee (Mandatory 1 year only) for EACH camera device connected to the VMS that warrants from license activation: 1) Free access to VMS upgrade for any new camera fw version- 2) 100% credit on the owner's current VMS product when upgrading to a more advanced version of the same VMS product. 3) Priority handling of response time to support phone calls based on the criticality of the problem, for questions sent via email or that cannot be answered during the initial phone call. 4) Additional years of access to software upgrades must be available separately for purchase **euro**	a corpo	
Nr. 140 N.P.E 13- LF	Supply and installation of outdoor pole head luminaire, including high-efficiency lens systems in quadruple heat-resistant and UV-resistant arrangement. With asymmetrical wide-beam light distribution. For street lighting according to lighting classes. LED system consisting of 2 LED modules each. Luminaire luminous flux 2200 lm, power consumption 20.00 W, luminaire brightness 110 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Color tolerance (initial MacAdam) < 5 SDCM. Anthracite color, metallic, highly weatherproof, powder-coated. With PMMA cover lens, molded. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating to IEC 62262: IK09. With digital dimming transformer (DALI). 10 kV overvoltage resistance. Parameterizable ballast with luminous flux stabilization (CLO). Composed in the offering: - Die-cast aluminum pole mount; - Decorative cast aluminum wall mount. Ø 42 mm x 100 mm bracket. Angle of inclination 10°. Anthracite color, metallic, highly weather resistant; Reference on plan **LF07** (outdoor gantry area installation). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 141 N.P.E 15- HW/TVCC	Video surveillance system design and sizing. Charges for Video Surveillance system design and sizing by certified design engineer for the proposed VMS. VMS software installation on the dedicated hardware systems, acquisition of all camera equipment (cameras) carried out by certified engineer technician for the proposed VMS. VMS system start-up and integration with third-party software required by the client. Final testing and delivery and Operator Training. 3 System optimization interventions and performance monitoring at 30g,60g,90g. **euro**	a corpo	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 142 N.P.E 17- LFE RIBA 4	Supply and installation of LED emergency lighting fixture for anti-panic area indication (equipped with symmetrical lens) for ceiling-mounted installation with the following characteristics: - Optics: standard heights - System type: (autonomous with centralized supervision) - Autonomy: 3h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 403lm - Battery: Ni-Cd 4.8V 1.4Ah - Battery type: Nickel cadmium - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 9.3W - Insulation class: II - Degree of protection: IP42 (from below), IP20 (from above) - Degree of protection against mechanical impact: IK07 - Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Complies with RoHS2 2011/65/EU - Installation: recessed, Reference on plan **LFE04** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 143 N.P.E 18- RI	Supply and installation of Addressable Optical Analog smoke detector interactive with integrated isolator, alarm threshold selectable from 8 available levels, self-compensation function CE CPD EN54-7, EN54-17 and EN54-18 certified. Including: - No. 1 Standard analog/conventional detector base supplied with holder for adhesive label indicating detector type references. Reference in plan **FA03/FA04/FA05** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 144 N.P.E 19- RI	Supply and installation of interactive addressed analog thermal detector with integrated isolator, alarm threshold selectable from 6 available levels (thermostatic and thermovelocimetric). CE CPD EN54-5, EN54-17 and EN54-18 certified. Includes: - No. 1 Standard analog/conventional detector base supplied with holder for adhesive label indicating detector type references. Reference in plan **FA06** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 145 N.P.E 22- RI	Supply and installation of addressable resettable manual fire alarm button with built-in isolator. CE CPD EN54-11 and EN54-17 certified. Supplied with recall key for wall installation. Includes: - No. 1 Red button bottom for wall installation - No. 1 aluminum sign 12x18cm for identification of alarm buttons bearing the symbol according to UNI EN ISO 7010 and the inscription PULSANTE ALLARME ANTINCENDIO Reference on plan **FA01** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 146 N.P.E 23- RI	Supply and installation of addressed acoustic optical panel with integrated isolator for fire alarm signaling. Features controlled output (24 VDC, 500 mA) for connecting conventional alarm devices. 24 VDC external power supply. Sound pressure of 94 dB @ 1 m. Ability to use 2 of 4 available tones and optical part for 2-stage alarm. IP54. Supplied with adhesive film FIRE ALARM. EN54-3 and EN54-17 certified. Includes: - No. 1 Relay interface for buzzer control; Reference on plan **FA02** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 147 N.P.E 24- RI	Supply and installation of interactive addressable module with integrated isolator equipped with **1 input and 1 relay output** with changeover contact. Supplied in plastic box. CE CPD EN54-17 and EN54-18 certified. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 148 N.P.E 25- RI	Supply and installation of interactive addressable module with integrated isolator equipped with **4 inputs and 4 relay outputs** with changeover contact. Supplied in plastic box. CE CPD EN54-17 and EN54-18 certified All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 149 N.P.E 26- RI	Connection point or predisposition point component fire detection system composed of: - empty pvc piping, length 25mm; - junction box (round or rectangular) conforming to the place of installation, for fixing device to be mounted on the ceiling/floor/wall in an easily accessible position; - part of the PH120' 2x1,5mmq fire-resistant cable for CPR-UNI9795 compliant smoke detection systems derived from the control unit; - label identifying the predisposition itself; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 150 N.P.E 29- RI	Fees for connection point or predisposition point mechanical system components to be interfaced to the fire detection equipment such as (valves/ flow switches, control units, manometers) present in the fire rooms, water treatment stations consisting of: - empty pvc piping, length 25mm; - junction box (round or rectangular) conforming to the place of installation, for fixing device to be mounted on the ceiling/floor/wall in an easily accessible position; - part of the PH120' 2x1,5mmq fire-resistant cable for CPR-UNI9795 compliant smoke detection systems derived from the control unit; - label identifying the predisposition itself; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 151 N.P.E 31-QE	**DB-VVF.MIL.L6** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 152 N.P.E 32-QE	**DB-RIC.01** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 153 N.P.E 33-QE	**DB-RIC.02** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 154 N.P.E 34-QE	**DB-RIC.03** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including:

1. GENERALITY

The document **3603 ES E EE 01a** is an integral part of the project description with the following address. This project was prepared by L22, a part of Lombardini S.p.A. located at Via Lombardini 22, Milan.

This volume, along with the remaining volumes of the Technical Report, drawings, and documents produced by the Client related to the general supply conditions, must be countersigned for acceptance on every page and returned to the Client. Examining all the documents is, therefore, a fundamental condition for the quotation and execution of the systems. Everything contained within is also fundamental for the correct interpretation of the instructions and provisions found in the other project documents. If there are any doubts about the correct application of their content, you should inform the designer so that they can provide the necessary clarifications in a timely manner.

The designer cannot be held responsible for any consequences resulting from the failure to comply with the above.

2. CLARIFICATIONS:

The descriptions provided here indicate the minimum functional performance requirements. The Contracting Company must carefully examine all the data and provisions contained in this document, as they will be fully and unconditionally responsible, by contractual agreement, for the correct functioning of the system, ensuring compliance with the specified conditions and operational requirements.
Regarding topics not covered or specific details not mentioned, it is required that the materials used and the execution of the work comply with European standards of equivalent value and have standardized dimensions according to the current Uni and DIN tables.
Further clauses regarding the relationship between the Client and the Contracting Company will be defined in the Contract of Award, to which this document and its attachments are an integral part.
Materials for which samples have been requested cannot be installed until they are accepted by the Site Management. The Contracting Company should not install materials rejected by the Site Management and should remove them from the construction site. The products to be installed should be those indicated in the project or, in the absence of a specific indication, those listed in the brand list.
The minimum warranty period is **24 (twenty-four)** months from the start of operation, as established by the Italian Codice Civile, Art. 1667. During this period, all defective parts must be replaced free of charge and in the shortest possible time.
The prices include and compensate for all expenses for labour, necessary supplies, their processing and use, allowances for access, deposits, site occupation, temporary and different occupations, provisional means of labor, and any other conditions specified in the safety plan attached to the documentation, with no exceptions, as well as charges, transportation, unloading, and everything else necessary to ensure that the work is completed to the highest standards and in full efficiency. The prices also include compensation for all the expenses that the contractor will incur for this purpose, even if not explicitly specified or referred to in the various articles of the list, except for what is explicitly excluded and, in any case, the scaffolding for external works outside of buildings.

If the project documentation contains conflicting data or information, the more costly and safety-beneficial ones shall be considered. The type of contract is defined in the contract drafted by the Client. The Contract will be awarded to a General Contractor, who will be responsible for the complete implementation of the work, of which the project in question is one of the constituent parts.
All works related to the contract will be carried out by the contractor in accordance with the provisions and conditions specified in the project drawings. It is essential to note that these provisions are not exhaustive, as the contractor expressly commits to executing the work in perfect accordance with the state of the art, in compliance with current legal regulations, to deliver a fully operational system at the offered price. In any case, it is the responsibility and obligation of the installer to deal with any issues arising from the application of clearly incorrect indications, such as those due to printing errors or the omission of essential safety measures if such errors/omissions are detectable based on the technical knowledge that the installer, by law, must possess, ensuring the conformity of the systems with the state of the art.
All works must be coordinated with the execution of other tasks, and the construction schedule must be submitted to the Site Management. During the course of the work, in accordance with the site and Client's needs, temporary works may be required to maintain the operation of existing systems or to enable the temporary operation of systems covered by this contract. The Contractor will be responsible for the operation of functional areas that must be kept operational during the work.
No changes in the execution of the planned works can be made by the installation company without prior approval and written authorization from the Client and the Site Manager.
If personnel engage in actions deemed serious by the Site Manager, they are granted the authority to immediately expel them without the Contractor being entitled to seek an extension or damages.

The Contractor, upon signing the contract, indemnifies the Client from any possible recourse action by subcontractors in the event of a dispute between the Contractor and the subcontractor.

The following points are the responsibility of the Contractor:

- Costs related to procedures for the application and compliance with regulations;
- certificates, etc., regarding the installation;
- Costs related to commissioning, fine-tuning, and testing of the system;
- Training of the Client's personnel;
- Inspection costs;
- Warranty costs;
- Costs related to documentation, as-built drawings, manuals, operating instructions;
- certifications according to current regulations;
- Documentation as required by D.M. 37/08. Attached to the compliance declaration, forms for submitting the declaration to ISPESL and ASL/ARPA must be prepared, in accordance with DPR 462/01;

- Costs related to on-site safety;
- Costs for coordination with other Contractors directed by the Client;
- Costs for site cleaning;
- Disposal of waste materials in authorized landfills;
- Costs for the custody and protection of materials installed and stored;
- Site organization;
- Costs for connections and temporary systems;
- Costs for personnel hygiene;

	LUMP SUM WORKS					
	Note (SpCat 1)					
1 / 515 N.P.E 01-NOTE	INTRODUCTION The quantities of materials indicated in the BOQ are to be considered approximate and must be checked by the Firm at the time of tender. It is understood that the acceptance of said quantities by the Firm entails the obligation to execute the installations as designed without the possibility of requesting in the course of the work variants for more supplies unless these have been expressly requested in the course of the work by the Client. The prices used to compose the following metric statement, were taken from: - Average market prices (N.P.E) - Specific bids from type suppliers - Electrical installations information price list version December 2022 The list of materials below must be completed by the Tender Company by filling in: 1. the column of unit prices, which will be used as unit prices in the accounting of any additional works and for any deductions in the case of partially completed works; 2. the column of total costs resulting from the product quantity by unit price. However, it should be recalled once again that the installation is to be considered contracted on a forfeit price basis.					
	SUB TOTAL a corpo			0,00	0,00	0,00
2 / 516 N.P.E 02-NOTE	NOTE All prices are considered to include charges for the production of Construction Drawings Documentation: - Fees for the production of construction documentation, to be delivered to the DL in computer copy prior to execution of the work. Documentation must include coordination between architectural, electrical and structural drawings. - Fees for the production of electrical system construction drawings including dimensions of fixtures, conduits,lighting fixture traces, overlap with other ceiling electrical systems, electrical switchboard schematics, installation dimensions and technical characteristics of components to be installed.					
	SUB TOTAL a corpo			0,00	0,00	0,00
3 / 517 N.P.E 03-NOTE	NOTE: Included in all prices are charges for the production of as-built documentation, to be delivered to the client in triplicate hard copy and computer copy. The documentation should include the updating of all graphic design documentation, diagrams of all systems built, the typical connections used and the programming set in the power plants, certifications and approvals of the materials used together with the manufacturer's documentation.

4 / 712 N.P.E 08-SPE	Supply and installation of antiseismic bracketing mainly for ceiling ducts, made with modular systems for medium-heavy applications. Composed of S250 GD steel rails, with ribbed C-section with 20-micron thick sendzimir galvanizing. Including S235 JR steel connecting elements, suitable S235 JR galvanized steel collars, galvanized hammer nuts and all fastening hardware. Including charges for the construction design of the system, and any other accessories and charges necessary to give the anti-seismic bracketing in place finished and in working order. All inclusive of all accessories and charges to give the system finished and functioning professionally.

316 / 511 N.P.E 02-KNX	Supply and installation of switchboard for lighting control KNX/DALI system, (TYPE 2) including: - No. 1 KNX/IP Router that allows the forwarding of telegrams between various lines via LAN (IP). The device can also be used as a communication interface in order to connect a PC to the KNX bus. The router supports up to 8 tunneling channels. No additional power supply is needed beyond that of the KNX bus. E60715 DIN rail mounting. - No. 3 KNX 640mA power supply, with two outputs: KNX and 30 V DC for additional devices. Two identical power supplies can be connected in parallel on the same line. The KNX power supply has a potential-free relay output as a signaling contact for operation or diagnostic messages. Rated voltage: 220-240 V AC, 50/60 Hz, KNX output voltage: 28-31 V DC SELV, Output current: 640 mA (all outputs);

	E23 - Fire alarm systems / Impianto Rivelazione Incendi (SbCat 23)					
374 / 158 N.P.E 02B-RI	Supply and installation of General fire terminal for alarm reporting. The terminal is a remote panel from the control panel that can optionally operate with its own power supply. The control panel provides installation locations available for optional interfaces such as RS232' RS485' network modules and key switch. Each station has an Ethernet connector to connect other terminals or a PC for remote operations/configurations. High-performance networking makes it possible to connect up to 32 between central stations and terminals. Connection to a centralized system via BACnet. Including local power supply and two 12V / 7Ah batteries. Including branch in rigid and/or flexible PVC piping from cable conduit, including junction box and completion accessories. All inclusive of all accessories and charges to give the system finished and functioning

	E25 - Emergency Intercom System / Impianto Interfonico di Emergenza (SbCat 25)					
399 / 95 N.P.E 01-SOS	Supply and installation of wall-mounted INTERCOM SERVER, without transformer, expandable into a system for up to 25,000 users in a single local area network. Must allow connection of IP, 2 or 4-wire terminals, with the possibility of mixed configurations. Integrated functions for control of gates and doors, alarms, video interface, control console, etc.; possibility of implementation of security and communication systems for networks composed of up to 14,280 Intercom Servers and up to 30,000 users. It must also be possible to receive and forward calls to and from the public telephone network, e.g., via VoIP or PSTN. Server with 5 slots available for plug-in cards, Maximum number of users: - IP 40 Users per Intercom Server (80 with expansion module). - Digital 20 Users per Intercom Server (40 with expansion module) - Analog 20 Users per Intercom Server (40 with expansion module) - Possibility of mixed configurations One AF input (for music or alarms), two inputs for floating contacts, two relay outputs, RS232 and IP interfaces for system maintenance and programming (including remote). Complete with: - No. 1 high-efficiency 65W 24V DC switching power supply; - No. 1 power cable 1.5 m; - No. 1 base card for LAN connection Network card with IP protocol for LAN networks (8 connections); - No. 1 base card for 4 users, FUNCTIONAL LEVEL B DSP user card for connecting up to 4 digital users with 2-wire lines. Up to 5 cards (10 with expansion module) G3-GED can be used in a GE 300 IP Intercom Server. It has one simultaneous conversation channel for each user (non-blocking system); - No. 1 upgrade license from G3-GED-4B to G3-GED-4P; All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Server Interfonico impianto SOS* *ENG: SOS Intercom Server* RIBA 3 RIBA 4			1,00

488 / 101 N.P.E 01- RI	Supply and installation of Fire Detection Control Panel, **8 loops** analog addressed in medium box complete with command and control panel with color graphic display and 24 Vdc 5 A power supply. Basically equipped to manage 8 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 8 loops = 16 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Specific fiber optic converter (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 Vdc, absorption 35 mA @ 24 Vdc, mounting on DIN rail. All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Centrale Fumi 8 Loop CCS01 - Entrance Room West* *ENG: Fire detection control Panel 8 Loop - Entrance Room West* RIBA 3			1,00

The cross section of Neutral and protective conductor are equal to the cross section of Phases. The busbar conduit must have fire and earthquake certificates. Reference standard IEC61439-6. The conduit shall allow the installation of Plug-nPlay type junction boxes. The junction boxes must be able to be safely installed or removed from the busbar conduit in the presence of voltage and must be able to be installed or removed at any point along the conduit, outside the joints. All inclusive of all accessories and charges to give the system finished and functioning in a state of good works. *ITA: Elemento rettilineo speciale per condotto sbarre 630A*

982 / 295 N.P.E 04- CL	Supply and installation of wall recessed light control point for centralized control of ordinary zone lighting fixtures with intumescent protection for applications on REI compartments. Light switching control via 2/4-button pushbutton, with KNX/DALI (Digital Addressable Lighting Interface) protocol for local lighting fixture switching management and DALI scenario management (ON-OFF-DIMM +/-). The dimmable button must provide a controlled lighting setting between 30% and 70% of full lighting power. Realization of light control point, consisting of: - supply of No. 1 single-pole rocker switch; - Recessed pushbutton interface for KNX bus. It has 2 inputs for potential-free contacts and 2 outputs to drive LEDs. Power supply from the bus; - Supply of KNX BUS 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; It is included in the tender: Supply and installation of protection of electrical fruit boxes in walls (plasterboard and non-plasterboard) made by application of intumescent sheathing insertable inside a fruit box, adhering to the bottom and side walls. The restoration will ensure the degree of protection EI 120: - on flexible wall EI 120 for fire/cool side application in boxes of size 503 - on rigid wall, min. thickness 135 mm, for fire/cool side application in 503 boxes. Complete with all completion accessories such as (boxes,frame,plates,) device programming and protection certification to give the light control point finished and working in a workmanlike manner. Civil series and BTicino Light finishing plates (GE plate) to be confirmed with Architectural DL at the construction site. *ITA: Comando luce tramite pulsante KNX con protezione intumescente - Mep Gallery P00 Data Hall*

985 / 390 N.P.E 01-KNX	Supply and installation of switchboard for lighting control KNX/DALI system, (TYPE 1) including: - No. 1 KNX/IP Router that allows the forwarding of telegrams between various lines via LAN (IP). The device can also be used as a communication interface in order to connect a PC to the KNX bus. The router supports up to 8 tunneling channels. No additional power supply is needed beyond that of the KNX bus. E60715 DIN rail mounting. - No. 2 KNX 640mA power supply, with two outputs: KNX and 30 V DC for additional devices. Two identical power supplies can be connected in parallel on the same line. The KNX power supply has a potential-free relay output as a signaling contact for operation or diagnostic messages. Rated voltage: 220-240 V AC, 50/60 Hz, KNX output voltage: 28-31 V DC SELV, Output current: 640 mA (all outputs); - No. 2 REG-K KNX DALI two-channel gateway to connect the DALI bus to the KNX system. Supports control (switching and dimming) of 128 electronic ballasts (64 ballasts per channel) controllable in 16 groups per channel. Supply voltage: 120-240 V C/DC, 50/60 Hz Outputs: 2 x DALI D+, D-, DC 16-18 V (basic isolation, not SELV), 250 mA max; - No. 1 Switching actuator, KNX standard, relay outputs 230 V AC 16 A on resistive load (led 200 W), manual controls on board module, switching status indication led, choice of command function (instantaneous, delayed, impulse switching), participation in centralized commands with storage and scene recall, ON/OFF switching functions, impulse, ON/OFF delay, stair lights with warning, power supply 230 V AC, in modular housing IP 20 degree of protection, installed on DIN35 rail, including system activation: 8 outputs - No. 1 Line or sector coupler for connection to BUS backbone, power supply via BUS line, status display LED and button for physical address programming, complying with EN 50090 standard, in modular insulated enclosure installed on DIN35 bar, this one excluded, including system activation. Including charges for the constructive design of the system, equipment containment switchboard, wiring and fixing accessories, share of knx bus cables for device connection and any other accessories and charges necessary to give the KNX/DALI lighting control switchboard in finished and working order. *ITA: Centralino controllo KNX/Dali - Data Hall ed aree annesse* *ENG: KNX/DALI Control Panel - Data hall and attached areas* RIBA 3 RIBA 4			1,00

	15 - IDF (Cat 7) **E5 - Hot aisle compartmentation / Compartimentazione corridoio caldo (SbCat 5)**					
1090 / 99 N.P.E 01-CC	Supply and installation of partitioning for hot corridor "HIGH ceiling" for 1 island 16000mm long, with double transparent sliding door entrance and exit and portion for insertion Visual structure dim.100x30cm approx. included. The partitioning will be done with Modulan Polycarbonate panels and aluminum frame and will be suspended from the ceiling. Below the vertical panels and in support on the roof of racks, will be placed 300mm high brushes for containment . Realization of front and rear closures through properly shaped panels for entry of all electrical conduits. Installation with attachment directly to the suspended ceiling. All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Corpartimentazione armadi Rack - Locali IDF E/W* *ENG: Rack Cabinets Partitioning - Locali IDF E/W* RIBA 3 RIBA 4			4,00

	E33 - REI Partitions / Ripristino Compartimentazioni (SbCat 33)					
1165 / 887 N.P.E 02-REI	Supply and installation restoration of walkway crossing on flush and / or non-flush wall holometry, made by applying fireproof bearings positioned above the cable tray by placing the certified side of 120 mm parallel to the wall thickness and sealed with water-based fire sealant that guarantees a perfect seal to smoke and flames. This system is designed to quickly seal cable tray crossings inserted into slots larger than the size of the walkways. Restoring will ensure the degree of protection:- EI 120 on hard wall not flush min. 125 mm for cable trays dimensions up to 600x100 mm- EI 120 on rigid wall flush min. 135 mm for cable trays dimensions up to 500x100 mmThe work will be supplied complete with identification plate, applied in a legible position, with identification of the intervention, date of execution and certification details. Restoration by crossing No. 1 cable tray or group of walkways adjacent to each other.For the precise identification of the restoration points, consult the project tablesIncluding assistance and drafting of fire prevention documentation and the compilation of the form and CERT REI certification, drawn up by a qualified technician and registered in the former register 818 as well as accessory elements of completion to give the work complete and functioning. *ITA: Ripristini attraversamenti REI* *ENG: REI crossings repair*

1. GENERALITY

The document **3603 ES E ME 01a** is an integral part of the project description with the following address. This project was prepared by L22, a part of Lombardini S.p.A. located at Via Lombardini 22, Milan.

This volume, along with the remaining volumes of the Technical Report, drawings, and documents produced by the Client related to the general supply conditions, must be countersigned for acceptance on every page and returned to the Client. Examining all the documents is, therefore, a fundamental condition for the quotation and execution of the systems. Everything contained within is also fundamental for the correct interpretation of the instructions and provisions found in the other project documents. If there are any doubts about the correct application of their content, you should inform the designer so that they can provide the necessary clarifications in a timely manner.

The designer cannot be held responsible for any consequences resulting from the failure to comply with the above.

2. CLARIFICATIONS:

The descriptions provided here indicate the minimum functional performance requirements. The Contracting Company must carefully examine all the data and provisions contained in this document, as they will be fully and unconditionally responsible, by contractual agreement, for the correct functioning of the system, ensuring compliance with the specified conditions and operational requirements.
Regarding topics not covered or specific details not mentioned, it is required that the materials used and the execution of the work comply with European standards of equivalent value and have standardized dimensions according to the current Uni and DIN tables.
Further clauses regarding the relationship between the Client and the Contracting Company will be defined in the Contract of Award, to which this document and its attachments are an integral part.
Materials for which samples have been requested cannot be installed until they are accepted by the Site Management. The Contracting Company should not install materials rejected by the Site Management and should remove them from the construction site. The products to be installed should be those indicated in the project or, in the absence of a specific indication, those listed in the brand list.
The minimum warranty period is **24 (twenty-four)** months from the start of operation, as established by the Italian Codice Civile, Art. 1667. During this period, all defective parts must be replaced free of charge and in the shortest possible time.
The prices include and compensate for all expenses for labour, necessary supplies, their processing and use, allowances for access, deposits, site occupation, temporary and different occupations, provisional means of labor, and any other conditions specified in the safety plan attached to the documentation, with no exceptions, as well as charges, transportation, unloading, and everything else necessary to ensure that the work is completed to the highest standards and in full efficiency. The prices also include compensation for all the expenses that the contractor will incur for this purpose, even if not explicitly specified or referred to in the various articles of the list, except for what is explicitly excluded and, in any case, the scaffolding for external works outside of buildings.

If the project documentation contains conflicting data or information, the more costly and safety-beneficial ones shall be considered. The type of contract is defined in the contract drafted by the Client. The Contract will be awarded to a General Contractor, who will be responsible for the complete implementation of the work, of which the project in question is one of the constituent parts.
All works related to the contract will be carried out by the contractor in accordance with the provisions and conditions specified in the project drawings. It is essential to note that these provisions are not exhaustive, as the contractor expressly commits to executing the work in perfect accordance with the state of the art, in compliance with current legal regulations, to deliver a fully operational system at the offered price. In any case, it is the responsibility and obligation of the installer to deal with any issues arising from the application of clearly incorrect indications, such as those due to printing errors or the omission of essential safety measures if such errors/omissions are detectable based on the technical knowledge that the installer, by law, must possess, ensuring the conformity of the systems with the state of the art.
All works must be coordinated with the execution of other tasks, and the construction schedule must be submitted to the Site Management. During the course of the work, in accordance with the site and Client's needs, temporary works may be required to maintain the operation of existing systems or to enable the temporary operation of systems covered by this contract. The Contractor will be responsible for the operation of functional areas that must be kept operational during the work.
No changes in the execution of the planned works can be made by the installation company without prior approval and written authorization from the Client and the Site Manager.
If personnel engage in actions deemed serious by the Site Manager, they are granted the authority to immediately expel them without the Contractor being entitled to seek an extension or damages.

The Contractor, upon signing the contract, indemnifies the Client from any possible recourse action by subcontractors in the event of a dispute between the Contractor and the subcontractor.

The following points are the responsibility of the Contractor:

- Costs related to procedures for the application and compliance with regulations;
- certificates, etc., regarding the installation;
- Costs related to commissioning, fine-tuning, and testing of the system;
- Training of the Client's personnel;
- Inspection costs;
- Warranty costs;
- Costs related to documentation, as-built drawings, manuals, operating instructions;
- certifications according to current regulations;
- Documentation as required by D.M. 37/08. Attached to the compliance declaration, forms for submitting the declaration to ISPESL and ASL/ARPA must be prepared, in accordance with DPR 462/01;

- Costs related to on-site safety;
- Costs for coordination with other Contractors directed by the Client;
- Costs for site cleaning;
- Disposal of waste materials in authorized landfills;
- Costs for the custody and protection of materials installed and stored;
- Site organization;
- Costs for connections and temporary systems;
- Costs for personnel hygiene;

	LUMP SUM WORKS					
	Note (SpCat 1)					
1 / 515 N.P.E 01-NOTE	INTRODUCTION The quantities of materials indicated in the BOQ are to be considered approximate and must be checked by the Firm at the time of tender. It is understood that the acceptance of said quantities by the Firm entails the obligation to execute the installations as designed without the possibility of requesting in the course of the work variants for more supplies unless these have been expressly requested in the course of the work by the Client. The prices used to compose the following metric statement, were taken from: - Average market prices (N.P.E) - Specific bids from type suppliers - Electrical installations information price list version December 2022 The list of materials below must be completed by the Tender Company by filling in: 1. the column of unit prices, which will be used as unit prices in the accounting of any additional works and for any deductions in the case of partially completed works; 2. the column of total costs resulting from the product quantity by unit price. However, it should be recalled once again that the installation is to be considered contracted on a forfeit price basis.					
	SUB TOTAL a corpo			0,00		
2 / 516 N.P.E 02-NOTE	NOTE All prices are considered to include charges for the production of Construction Drawings Documentation: - Fees for the production of construction documentation, to be delivered to the DL in computer copy prior to execution of the work. Documentation must include coordination between architectural, electrical and structural drawings. - Fees for the production of electrical system construction drawings including dimensions of fixtures, conduits,lighting fixture traces, overlap with other ceiling electrical systems, electrical switchboard schematics, installation dimensions and technical characteristics of components to be installed.					
	SUB TOTAL a corpo			0,00		
3 / 517 N.P.E 03-NOTE	NOTE: Included in all prices are charges for the production of as-built documentation, to be delivered to the client in triplicate hard copy and computer copy. The documentation should include the updating of all graphic design documentation, diagrams of all systems built, the typical connections used and the programming set in the power plants, certifications and approvals of the materials used together with the manufacturer's documentation.
